When NOT to reach for kpi.

Decorative pills without status semantics. The pills tint the layout (warn, breach, on-track). Don't use them as freeform tags — `On plan`, `At risk`, `Breaching`, `Compliant`, `Remediating` are the vocabulary the engine recognises.

More than four KPIs in attention or spotlight. `attention` highlights the metric that needs the room; `spotlight` monumentalises one number. Past four KPIs the visual hierarchy collapses — split into two slides.

No targets, no trends. If the KPIs carry only current values, the slide is a stats row, not a kpi dashboard. Use stats and reclaim the room.

See also.

RELATED COMPONENTS

- `stats` — metric row without targets or status pills
- `big-number` — a single number is the whole argument
- `split-metric` — one KPI with a paragraph of supporting prose
- `progress` — completion percentages across parallel workstreams
- `timeline-list` — milestones in time, not metrics at a moment
