8 COMPONENTS

comparison

Comparison — how two or more options differ.

What writing decisions down actually changed.

BEFORE.

Decisions lived in the room they were made in. Six months on, nobody could say why we killed the project — only that someone senior had felt strongly. Every quarter relitigated the same three debates from memory.

AFTER.

Every decision is logged with its signals, its options, and the bet it made. We still relitigate, but now there is a record showing we already decided this in March. We ignore it, but faster.

Renew at list price, or hold the discount.

HOLD THE PUBLISHED RATE

Protect the list price and signal pricing discipline to the rest of the base. Risks four at-risk accounts worth $2.1M ARR walking at renewal.

❯

EXTEND THE LEGACY DISCOUNT

Keep the four accounts by carrying their 2023 pricing one more year. Buys retention now, but the discount has already leaked to two prospects in the same segment.

How the three planning rituals compare.

RITUAL	CADENCE	OUTPUT	READ AFTER THE MEETING
Strategy offsite	Yearly	An 80-slide deck	The title slide
Quarterly business review	Quarterly	A scorecard	The red cells
Weekly signal review	Weekly	A decision-log entry	Whoever wrote it

Buy the platform; build the differentiation.

BUY AND CONFIGURE.

Adopt the vendor's data infrastructure — live in six weeks, freeing three engineer-quarters for the product layer where the differentiation actually lives.

BUILD IN-HOUSE.

Full control of schema and roadmap, but two to three engineer-quarters to reach parity with a platform we could adopt now and replace later.

Where the transformation bets land on effort and impact.

High impact · Low effort.

Weekly signal review
Decision-log template

High impact · High effort.

Scoring-model rewrite
Org-wide rollout

Low impact · Low effort.

Renaming the framework, again
A new Confluence space

Low impact · High effort.

Dashboards nobody opens
The maturity-model self-assessment

SB-362 rewrote the opt-out link rule.

Cal. Civ. Code §1798.135 · amendment SB-362 (2024)

KEY INSIGHT

A business that ~~collects~~ **collects, sells, or shares** consumers' personal information shall provide ~~two or more~~ **at least one** designated method for submitting requests to opt-out, **including, at minimum, a clear and conspicuous link on the homepage titled "Your Privacy Choices,"** for use by consumers to ~~opt out of the sale of~~ **direct the business not to sell or share** their personal information.

Why this matters. SB-362 collapses sale and sharing into one duty and pins a uniform link title — homepage chrome and DSAR workflows both need a uniform UX.

DECISION REQUIRED

Build the data layer or buy it?

Both paths are viable. The difference is where we spend the next 18 months.

BUILD IN-HOUSE

- Full control over schema and roadmap
- 2–3 engineer-quarters to reach feature parity
- Ongoing maintenance burden stays internal

BUY + CONFIGURE ✦

- Ship in 6 weeks, not 9 months
- Engineering capacity redirects to product-layer features
- Exit risk manageable — data export contractually guaranteed

RECOMMENDATION **Buy the infrastructure. Build the differentiation. Revisit in 24 months.**

Which data platform clears the bar.

Build in-house.

Certified · Residency · Export

Full control of every axis, and three engineer-quarters from having any of it.

Vendor North.

Certified · Residency · Export

Certified and in-region, but data export is support-gated, not self-serve.

Vendor West.

Certified · Residency · Export

Certified, in-region, and self-serve on every axis. Recommended.
