LAYOUT STUDIES · 2026

Boardroom Lists.

Five replacements for the default card-stack, each shown in two iterations

CONCEPT 01 · EDITORIAL

Trust the typography. No card chrome, just hanging numerals and body text.

What changed since the last review.

01 Net revenue retention climbed nine points after the price reset.

02 Two of three pilot accounts converted to annual contracts.

03 The platform engineering team consolidated under a single VP.

04 Compliance certifications closed on schedule for SOC 2 and HIPAA.

Three convictions for the year ahead.

01 **The pricing experiment is not a one-time correction.**

We expect to run two more structured price tests in the second half, each gated by a churn-impact threshold.

02 **Sales-led growth is the bottleneck, not the strategy.**

The pipeline is healthy at the top — the friction is in deal mechanics, not in demand.

03 **The platform team is the highest-leverage hire we make this year.**

Every product bet downstream of it accelerates or stalls on its capacity.

CONCEPT 02 · TRIBUNE

A full-bleed accent block holds a large mono numeral. The card body sits beside it.

Four bets, each with a single owner.

01 **Migrate the data platform to columnar storage. — Owner: Priya**

02 **Ship the multi-tenant scheduler to general availability. — Owner: Marcus**

03 **Open the European data residency region. — Owner: Wei**

04 **Launch the partner certification program. — Owner: Lena**

Each bet has a measurable milestone.

01 **Columnar storage cutover**

— 30% query-cost reduction at quarter close

02 **Multi-tenant scheduler GA**

— 2x throughput for the largest tenant

03 **EU residency region**

— First three customers running in production

04 **Partner certification program**

— 25 certified consulting partners

CONCEPT 03 · SPECTRUM

The lattice signature gradient runs vertically as a rail. The signature shows up inside content, not just at the slide edge.

What the market is telling us.

- Buyers want consolidated tooling — point solutions are out of favor.
- Procurement cycles have lengthened by roughly six weeks since last year.
- Three competitors have repositioned away from mid-market in the last quarter.
- Security review is now the longest stage in every enterprise deal we close.

The four phases of the platform rollout.

- **01** Internal dogfood — engineering and platform teams only.
- **02** Closed beta — twelve design partners under NDA.
- **03** Open beta — public waitlist with managed onboarding.
- **04** General availability — self-serve and assisted tiers.

CONCEPT 04 · SCORECARD

Every row starts with a stat. The body explains what it means.

What the quarter delivered.

9pp	— Net revenue retention lift after the pricing change.
62%	— Of new logos closed in under 45 days, beating the target.
3	— Compliance certifications closed in the quarter.
$4.2M	— Reduction in annual infrastructure spend on the storage migration.

The cost of the platform migration, in proportion.

$4.2M	— One-time migration cost, paid across two quarters.
38%	— Reduction in monthly storage and compute costs after cutover.
14 mo	— Payback period at the current usage trajectory.
0	— Customer-visible rollback events during the cutover window.

CONCEPT 05 · INDEX

Atlas-style. Mono counter, hairline rules, quiet authority.

This quarter's index of decisions.

01	Pricing model — move to a seat plus usage hybrid.
02	Platform — columnar storage approved, vendor selected.
03	Geography — EU region approved, U.S. east deferred.
04	Headcount — platform engineering plus six, GTM hold.
05	Partnership — three new consulting partners signed.

Capital plan by initiative.

01	Columnar storage migration —	Priya · $1.4M
02	Multi-tenant scheduler GA —	Marcus · $0.6M
03	EU residency region —	Wei · $2.1M
04	Partner certification program —	Lena · $0.3M
05	Security review automation —	Janet · $0.2M

FIVE CONCEPTS, TWO ITERATIONS EACH

Pick the two you want to keep.

The rest go in the drawer.
