# chart

Chart — series-substance data visualizations (SVG kernel).

2026 Q1 → 2026 Q4

## What ships in each phase, by workstream.

*Three workstreams across four quarters; the one at-risk bar quietly gates the entire rollout.*

|            | Q1               | Q2                   | Q3                 | Q4 |
|------------|------------------|----------------------|--------------------|----|
| Framework  | Signal taxonomy  | Scoring model v2     | Per-team weighting |    |
| Adoption   | Pilot onboarding | Weekly signal review | Org-wide rollout   |    |
| Governance | Decision log     | Calibration cadence  | Board reporting    |    |

## Where Phase 2 work stands today.

*Eight items across four stages; the scoring-model rewrite is the only card flagged at-risk, which is the polite way of saying it is the only one anyone has looked at.*

H1 2026 • 1,840 PERSON-HOURS

## Where the planning quarter actually went.

*Nearly half went to producing decks; the deciding itself was the smallest slice.*

## Phase 1 readiness, by workstream.

*Snapshot at 14:00 UTC. Status pills reflect the most optimistic reading of the available data.*

EFFORT 0-10 → REACH 0-100

# Where to put the next quarter, before someone reorganises the teams again.

*Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.*

SCALE · 0-10

# How we stack up across the buying criteria.

## SUBMISSION LIFECYCLE

# Document approval flow.

*How a draft moves from author to publication.*

Rejected drafts return to the author; revisions stay in review.

## DECISION FRAMEWORK

# How the framework arrived in production.

*Four stages over eighteen months, from the first workshop to the operating rhythm.*

What 38 win/loss interviews kept saying, by frequency.
