kanban

Kanban board — columns of cards by stage.

PHASE 2 · SPRINT 14

Where Phase 2 work stands today.

Eight items across four stages; the scoring-model rewrite is the only card flagged at-risk, which is the polite way of saying it is the only one anyone has looked at.

DELIVERY · WEEK 30

Same board, now you can see who owns what.

The left edge colour-codes each card by workload, so one team's load reads down a column at a glance — without the surface turning into a patchwork.

DELIVERY · WEEK 30

Colour tracks the pipeline, so the eye reads left to right.

Each lane is tinted by stage — backlog through done — so the shape of the flow registers before any single card does.

PHASE 2 · SPRINT 14

Stress test — four lanes, fifteen cards, and a Backlog that grows faster than Done.

PHASE 2 · SPRINT 14

Where Phase 2 work stands today.

When NOT to reach for kanban.

Schedule, If the question is when each task ships **not status.** rather than where it sits today, reach for **gantt** (spans) or **roadmap** (phases). Kanban is a snapshot, not a timeline.

More than five lanes. Past five columns the cards compress and the column headers crowd. Group adjacent stages or split into two boards (e.g. by team) instead.

Cards without meta. A board of bare titles wastes the layout's affordances. Add at least a size badge and a lane label so the audience can scan workload and ownership at a glance.

RELATED COMPONENTS

See also.

`gantt` — schedule of overlapping tasks across lanes, not current state

`roadmap` — phased grid of deliverables across workstreams

`checklist` — single list of items with done/in-flight/planned states

`verdict-grid` — options scored against shared criteria, not stage-tracked
