

PROGRESSION · SPLIT · STRUCTURE

split-steps

Sequential process — phase label + heading on the left, numbered step timeline on the right with a connecting line.

02

Discovery and Scoping

Four weeks. Shared definition of the problem before any solution work begins.

- 
- 1 Stakeholder Interviews**
Eight cross-functional conversations. Open questions only — listening for friction, not confirming assumptions.
 - 2 Current-State Audit**
System inventory, workflow documentation, and data-quality review feed a single source-of-truth artefact.
 - 3 Problem Framing Workshop**
Half-day session to align on root cause. Output is a ranked problem statement the team signs off on.
 - 4 Scope Confirmation**
Written sign-off on what is in, what is out, and what requires a separate decision.

When NOT to reach for split-steps.

Standalone process, no phase anchor. If the slide is one ordered process with no phase context, use `list-steps` or `timeline`. `split-steps` earns its split only when the left panel adds orientation.

Steps longer than two sentences. Each right-side step is a title plus a sentence or two. If a step needs a paragraph, lift to `list-steps` where the cards have body room.

More than one phase per slide. `split-steps` is one phase per slide; the watermark and intro paragraph anchor that single phase. Use consecutive `split-steps` slides for sequential phases.

RELATED COMPONENTS

- `list-steps` — standalone ordered process without a phase anchor
- `timeline` — horizontal sequence of short-labelled steps
- `roadmap` — phased grid across multiple workstreams
- `split-panel` — left-anchor + right-list shape without a step sequence
- `split-brief` — executive framing with substantiating findings rather than steps
