

Five killer roadmap layouts.

Workstream × phase grids that earn the slide.

What this deck shows.

Five table-driven roadmap layouts, all built from the same markdown source contract (workstream column on the left, phase columns to the right). One default plus four modifiers — `status`, `horizons`, `swimlane`, `milestones`. Each modifier adds visual chrome without changing how the table is authored.

LAYOUT · ROADMAP

What ships in each phase, by workstream.

WORKSTREAM	FOUNDATION	HARDENING	SCALE
	Q2 2026		Q3 2026
Platform	✓ Codebook signing	🚧 Multi-tenant DEKs	○ Per-purpose codebooks
Operations	✓ Manual rotation	🚧 Automated rotation	○ Crypto-shred
Compliance	✓ Audit trail (HSM)	✓ Centralised log	○ Examiner pack
SDK	✓ Java	🚧 .NET	○ Polyglot parity

Header text is the phase NAME; the trailing inline-code element becomes a right-anchored meta pill on the spectrum line. State markers `[x]/[-]/[ ]/[/]` are universal — they render as a small state-coloured glyph before the cell text: ✓ shipped, 🚧 in flight, ○ planned, / out of scope.

LAYOUT · ROADMAP STATUS

Where every workstream lands this quarter.

WORKSTREAM	FOUNDATION	HARDENING	SCALE
	Q2 2026	Q3 2026	Q4 2026
Platform	SHIPPED Codebook signing	IN FLIGHT Multi-tenant DEKs	PLANNED Per-purpose codebooks
Operations	SHIPPED Manual rotation	IN FLIGHT Automated rotation	PLANNED Crypto-shred
Compliance	SHIPPED Audit trail (HSM)	SHIPPED Centralised log	PLANNED Examiner pack
SDK	SHIPPED Java	OUT OF SCOPE .NET	PLANNED Polyglot parity

Same [x]/[-]/[]/[/] markers as the other variants. The status modifier upgrades them from the universal light treatment to a heavy one: full left-edge ribbon, tinted ground, and a mono-caps state eyebrow (SHIPPED / IN FLIGHT / PLANNED / OUT OF SCOPE) above the cell text.

LAYOUT · ROADMAP HORIZONS

Now, next, and later — by workflow.

PHASE 01

Now

Q2 2026

PLATFORM

✓ Codebook signing

OPERATIONS

✓ Manual rotation

COMPLIANCE

✓ Audit trail (HSM)

SDK

✓ Java

PHASE 02

Next

Q3 2026

PLATFORM

● Multi-tenant DEKs

OPERATIONS

● Automated rotation

COMPLIANCE

✓ Centralised log

SDK

—

PHASE 03

Later

Q4 2026

PLATFORM

○ Per-purpose codebooks

OPERATIONS

○ Crypto-shred

COMPLIANCE

○ Examiner pack

SDK

○ Polyglot parity

Same source table, transposed into three phase cards. State markers on the source cells flow through onto the card rows — each row's left rail picks up the state colour and the row carries the state glyph.

LAYOUT · ROADMAP SWIMLANE

Each workstream as its own track.

WORKSTREAM	FOUNDATION	HARDENING	SCALE
	Q2 2026	Q3 2026	Q4 2026
Platform	✔ Codebook signing	🔴 Multi-tenant DEKs	○ Per-purpose codebooks
Operations	✔ Manual rotation	🔴 Automated rotation	○ Crypto-shred
Compliance	✔ Audit trail (HSM)	✔ Centralised log	○ Examiner pack
SDK	✔ Java	—	○ Polyglot parity

Workstream cell becomes a lane label on its row's categorical ground; phase cells read as outlined cards along the track.

LAYOUT · ROADMAP MILESTONES

Phased rollout against the fiscal calendar.

WORKSTREAM	FOUNDATION	HARDENING	SCALE
	Q2 2026	Q3 2026	Q4 2026
Platform	✔ Codebook signing	🟡 Multi-tenant DEKs	○ Per-purpose codebooks
Operations	✔ Manual rotation	🟡 Automated rotation	○ Crypto-shred
Compliance	✔ Audit trail (HSM)	✔ Centralised log	○ Examiner pack
SDK	✔ Java	—	○ Polyglot parity

Same meta-pill convention as the other roadmaps — the difference is the calendar identity: phase columns get a soft alternating tint so the timeline reads as a fiscal grid.

Inspect, then merge.

Five table-driven layouts. One markdown source contract. Palette-blind, theme-portable.
