roadmap

Phased multi-workstream grid — phases across the top, workstreams down the side.

What ships in each phase, assuming the phases survive the next planning offsite.

WORKSTREAM	FOUNDATION	HARDENING	SCALE

When NOT to reach for roadmap.

One A single row **workstream.** of phases is a `timeline` or `list-steps`, not a roadmap. Roadmap earns its grid only when at least two workstreams move in parallel.

No state markers. A grid of bare deliverables loses half its value. Add `[x]` / `[-]` / `[ ]` / `[/]` so the audience reads progress alongside scope.

Past five More than five rows compresses cell text and the lane stripes lose their categorical **workstreams.** read. Group adjacent workstreams or split by phase.
