

State chart vs. content we've never seen.

Browser-measured layout: nodes are sized by the real text engine, edges are drawn from measured rects. These slides try to break it.

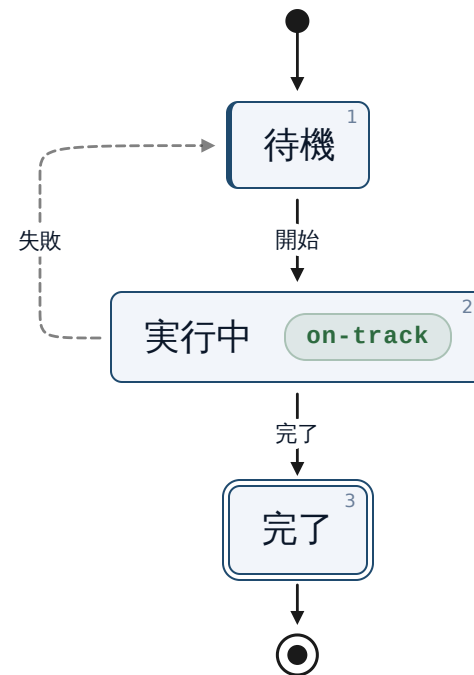

Single-letter states.

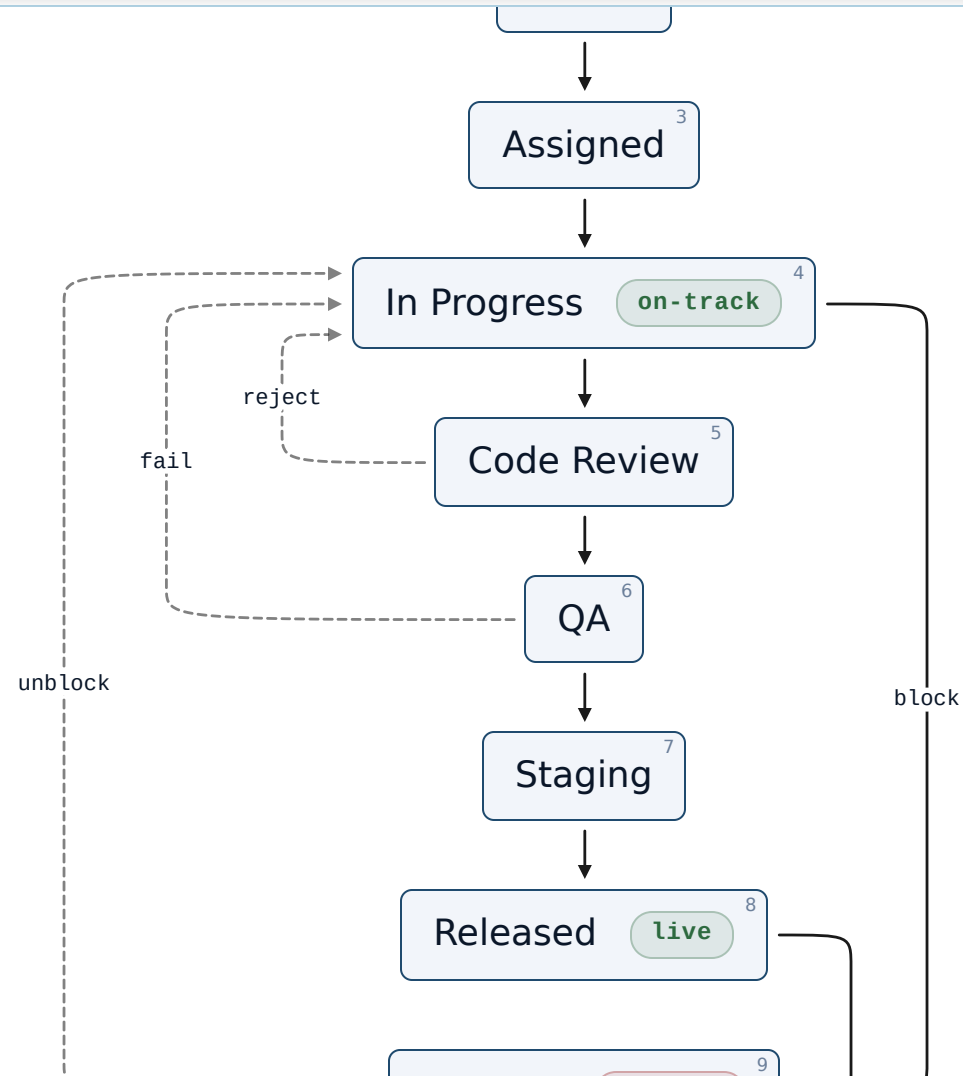

Long state names.

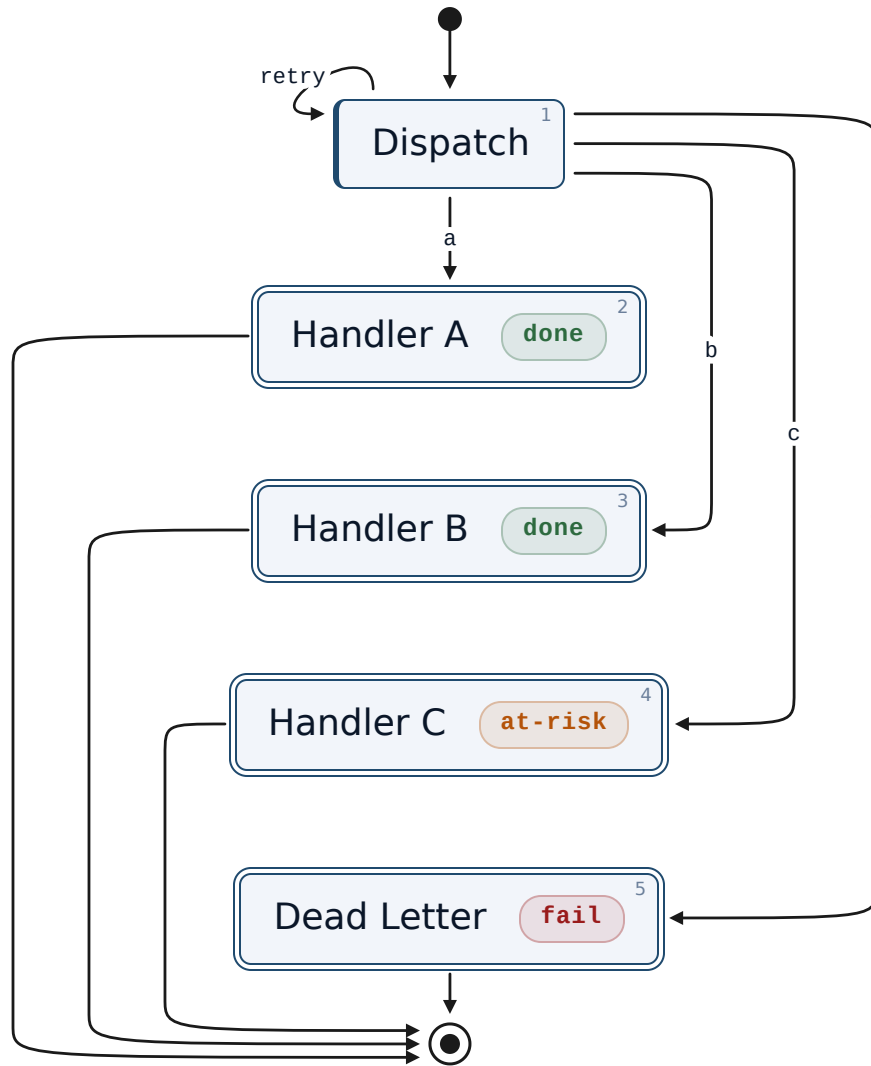

CJK state labels.

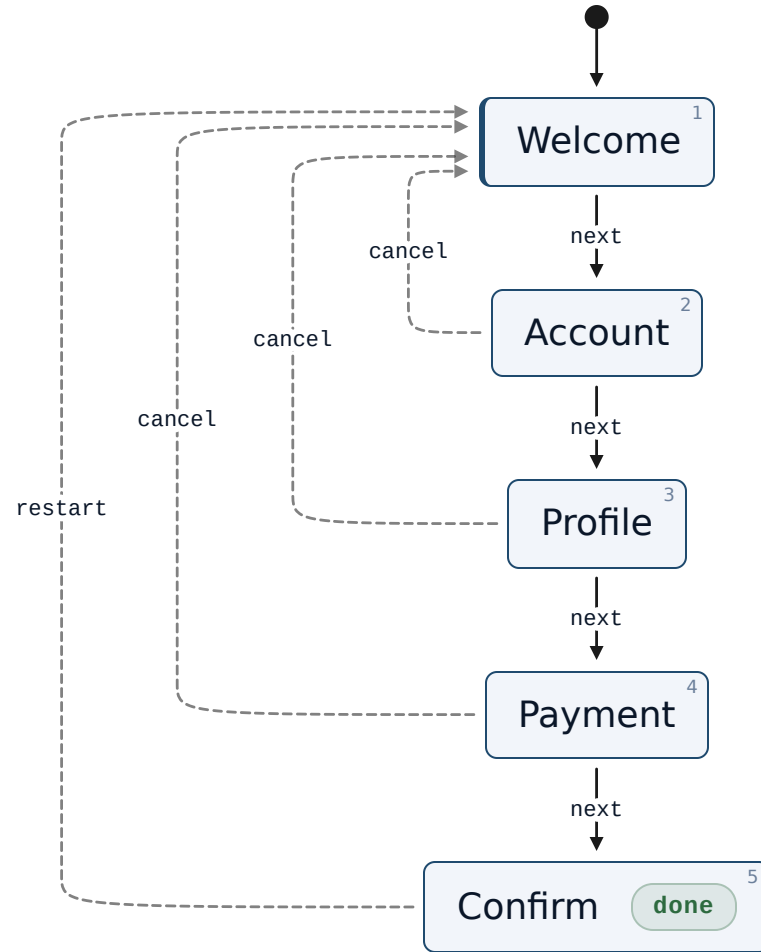

Ten-step pipeline.

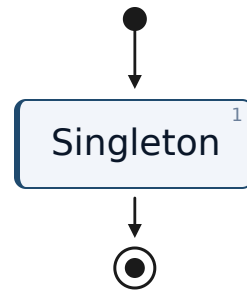

Router with many exits.

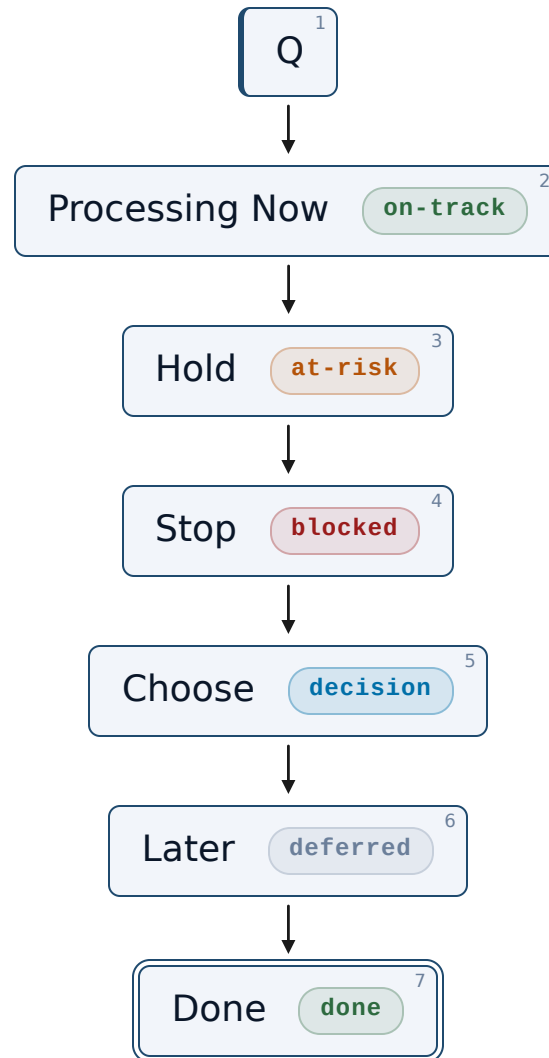

Wizard with escape hatches.

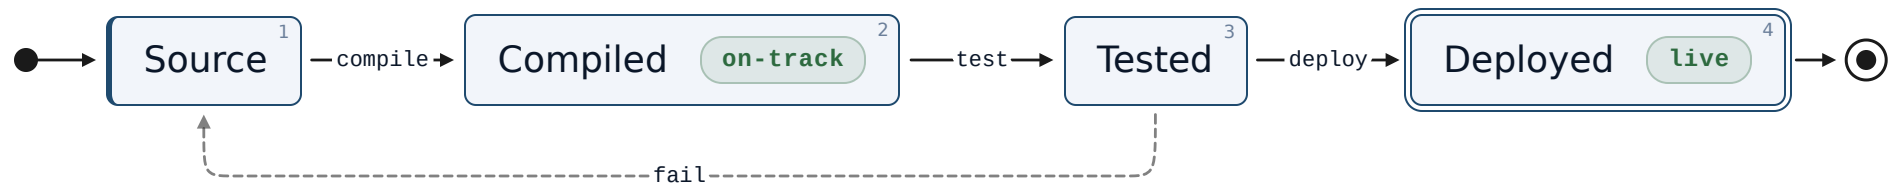

Degenerate: one state.

Status palette across widths.

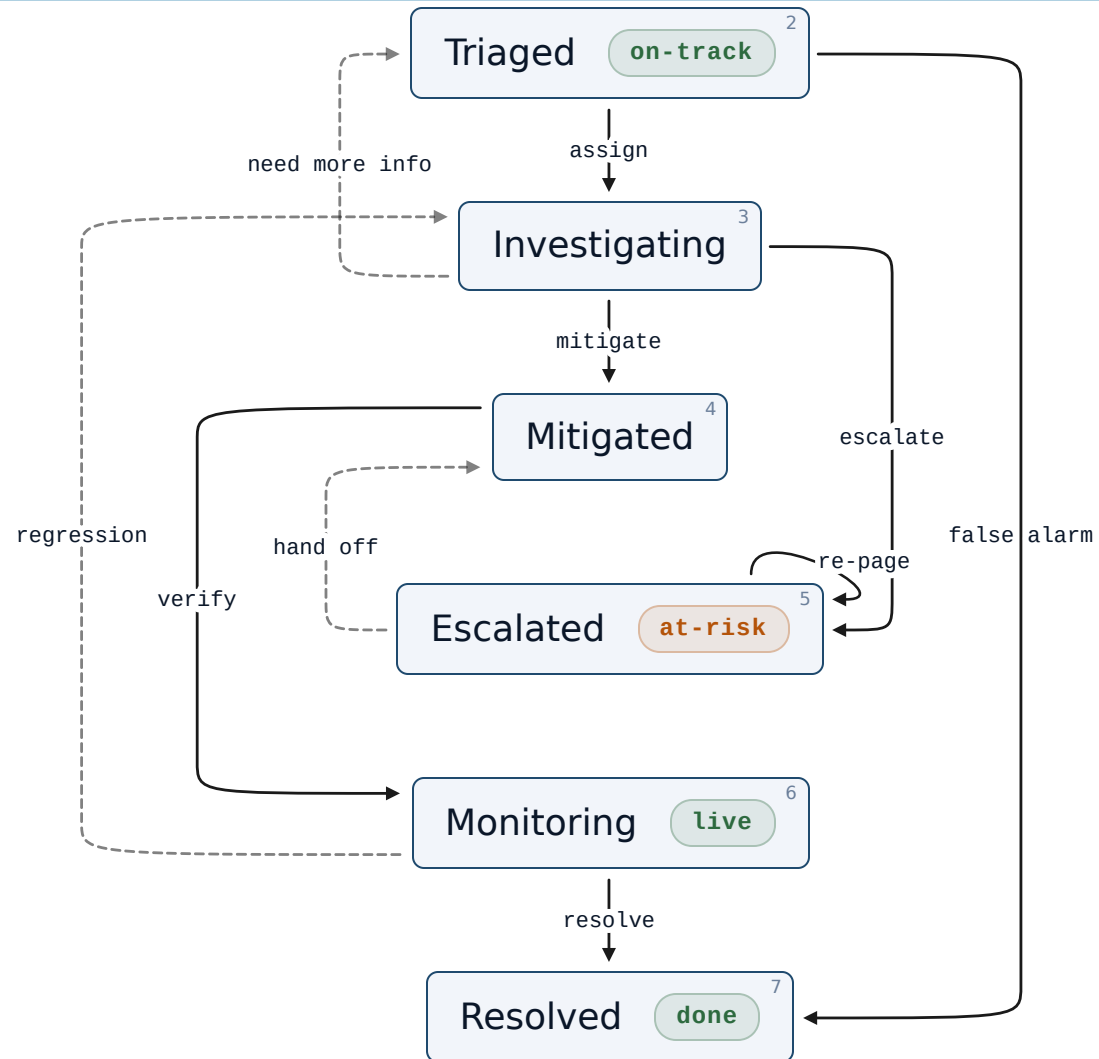

Left-to-right pipeline.

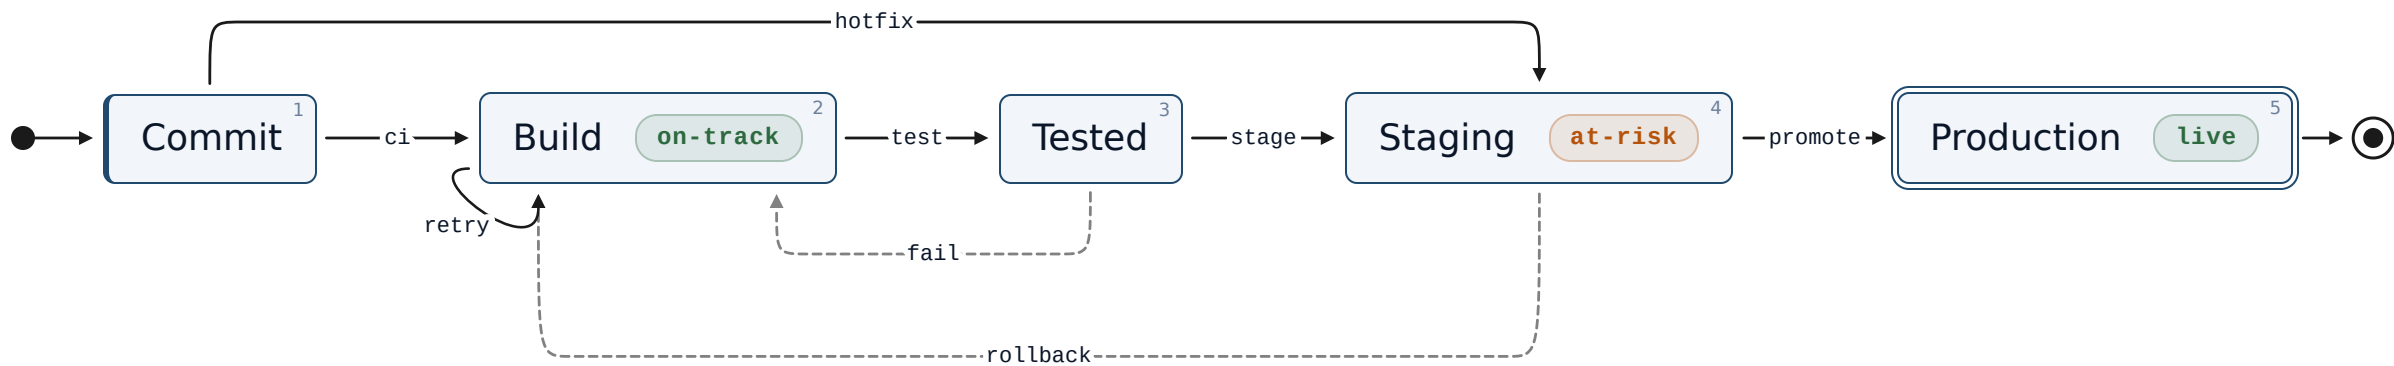

Connection (left-to-right).

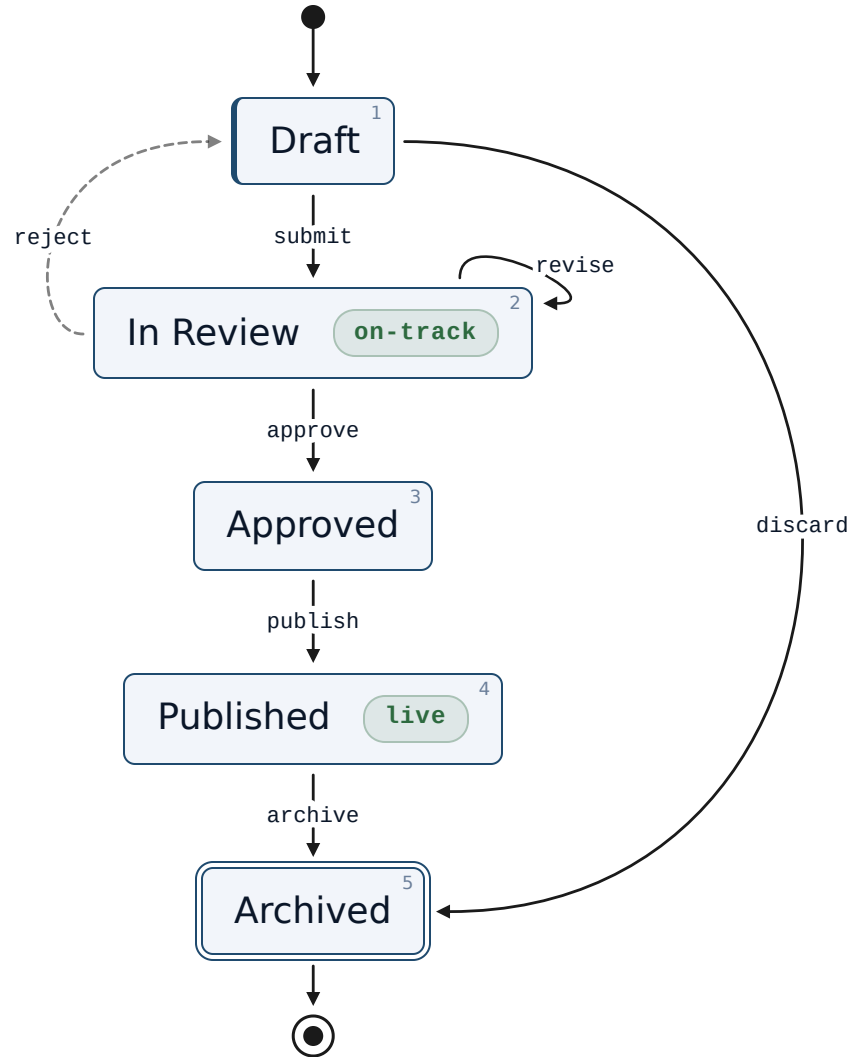

Incident response.

Build & release graph.

Document approval (curved).

Job runner (curved, lr).
