word-cloud

Spiral-packed word cloud — items sized by weight.

What 38 win/loss interviews kept saying, by frequency.

A word cloud visualization of feedback from 38 win/loss interviews. The words are arranged in a rounded rectangular frame. The most prominent word is 'time-to-value' in a large, light blue font. Other words in a medium-sized, light yellow font include 'onboarding', 'pricing', 'roadmap', 'integrations', and 'security'. Smaller words in a light grey font include 'support' (written vertically on the left), 'contracts', and 'residency'.

support time-to-value contracts
integrations security residency

What this branch named, by weight.

A word cloud constellation diagram on a dark blue background. The word 'component' is the largest and most central, rendered in a light blue color. Surrounding it are several other words in white: 'function' is positioned above 'component', 'gallery' is to its right, 'form' is to the right of 'component', 'substance' is below 'component', and 'manifest' is below 'form'. The words are connected by thin, light blue lines, forming a constellation-like structure.

What this branch named, by weight.

A word cloud visualization showing the relative frequency of terms in a branch. The words are arranged in a horizontal, slightly curved layout. The word 'component' is the largest and most central, rendered in a light blue color. Other words are in various shades of blue and grey. The words include: 'function' (top center), 'universal' (top right), 'substance' (middle left), 'form' (bottom left), 'variant' (bottom center), 'manifest' (bottom right), and 'gallery' (middle right).

What 38 win/loss interviews kept saying, by frequency.

A word cloud visualization of feedback from 38 win/loss interviews. The words are arranged in a rounded rectangular frame. The most prominent word is 'time-to-value' in the center, rendered in a large, bold, light blue font. Other significant words include 'onboarding' (top left, bold white), 'pricing' (top right, bold white), 'roadmap' (middle right, bold white), 'security' (bottom right, bold white), 'integrations' (bottom left, bold white), and 'support' (middle left, bold white and rotated 90 degrees counter-clockwise). Smaller words include 'contracts' and 'residency' located near 'roadmap'.

When NOT to reach for word-cloud.

Precise comparisons. If the audience needs to know that 'manifest' is 1.6× 'function', the spiral packing actively misleads. Use `progress` or a bar chart where the eye can compare lengths directly.

Two or three words. A three-word cloud is a list with extra steps. Use `stats` for a metric row or `big-number` for a single weighted headline.

Multi-word phrases. Each li should be a single token. Multi-word phrases blow out the layout and crowd the spiral; if your data is phrases, normalise to keywords first or use `quote` for verbatim text.

See also.

RELATED COMPONENTS

`progress` — the weights need precise visual comparison

`stats` — the headline metrics are independent numbers, not a corpus

`piechart` — the items are parts of a whole, not free-form themes

`quote` — the verbatim language matters more than the frequency

`tldr` — the qualitative summary is prose, not a packed cloud
