

6 COMPONENTS

# statement

Statement — one declarative claim per slide.

AUDIENCE RECALL

92%

of the audience remembers a  
single number from a deck. Make  
it count.

# The catch-all prose slide.

Use *CONTENT* when no more specific component fits. A heading, a paragraph, optionally a short bullet list. Keep the slide under forty words.

For lists of items, prefer `list`, `cards-grid`, or `cards-stack`.

For comparisons, prefer `compare-prose` or `compare-table`.

For single metrics, prefer `big-number` or `stats`.

“

*The signal was always there. We just didn't have a system that forced us to look at it before we'd already decided.*

”

— Head of Product, Pilot Team 3

# Enterprise revenue stalled in Q2.

Three structural factors explain 90% of the shortfall — all addressable before Q4 close.

**Renewal pricing complexity is driving churn at the segment ceiling.**

Four accounts totaling \$2.1M ARR declined renewal. Win/loss interviews point to a quote-to-contract gap, not value perception.

**Pipeline conversion dropped 11 pp below Q1 — legal review is the chokepoint.**

Contract length increased 18 days on average. Root cause is a security addendum introduced in March.

**Competitive displacement accelerated in the \$80-200K ACV tier.**

Seven losses to a single competitor. Time-to-value gap is the exposure.

# A

**A featured statement  
on the left lands the  
argument.**

## Use when

### **One claim deserves emphasis**

The panel headline carries the weight; the right side substantiates.

### **You need both a thesis and proof**

Statement on the left, evidence list on the right.

### **The right side is short**

Three to four supporting points; longer lists belong in cards-stack.

### **The mirror modifier flips it**

Image-style decks often want the panel on the right.

*The best product does not win. The most understood product does.*

Morgan Chase · Head of Product,  
Vercel, 2024

**Clarity is a product decision, not a marketing one.**

If a prospect cannot articulate our value in one sentence, the product has a communication architecture problem.

**Onboarding is the product's first argument for itself.**

The moment a user first succeeds defines their frame for everything that follows.

**Understanding, not delight, is the retention driver at scale.**

Users who understand the system's logic stay through friction. Build for comprehension.
