

NEW COMPONENT · INVENTORY · GRID · PROSE

The wall that vouches for you.

A grid of customer, partner, or funder marks — the social-proof slide every go-to-market and mission-driven deck reaches for, now a first-class layout instead of a hand-placed image.

One layout, every industry's proof slide.

The credibility moment shows up everywhere — it just wears a different label. *LOGO-WALL* desaturates the marks to one uniform grey so a loud red brand can't outshout a quiet one, and the wall reads as a single credential.

- Corporate calls it *trusted by*; nonprofits call it *our funders*; government calls it *participating agencies*.
- The **color** variant keeps brand hues for insignia and crests; **dense** packs a longer roster.
