

State chart vs. content we've never seen.

Browser-measured layout: nodes are sized by the real text engine, edges are drawn from measured rects. These slides try to break it.

Single-letter states.

Long state names.

CJK state labels.

Ten-step pipeline.

Router with many exits.

Wizard with escape hatches.

Degenerate: one state.

Status palette across widths.

Left-to-right pipeline.

Connection (left-to-right).
