

Six quadrant charts, one source contract.

Native SVG 2×2 chart. Group-by-quadrant Markdown. Eyebrow-declared scale.

No Mermaid, no charting library.

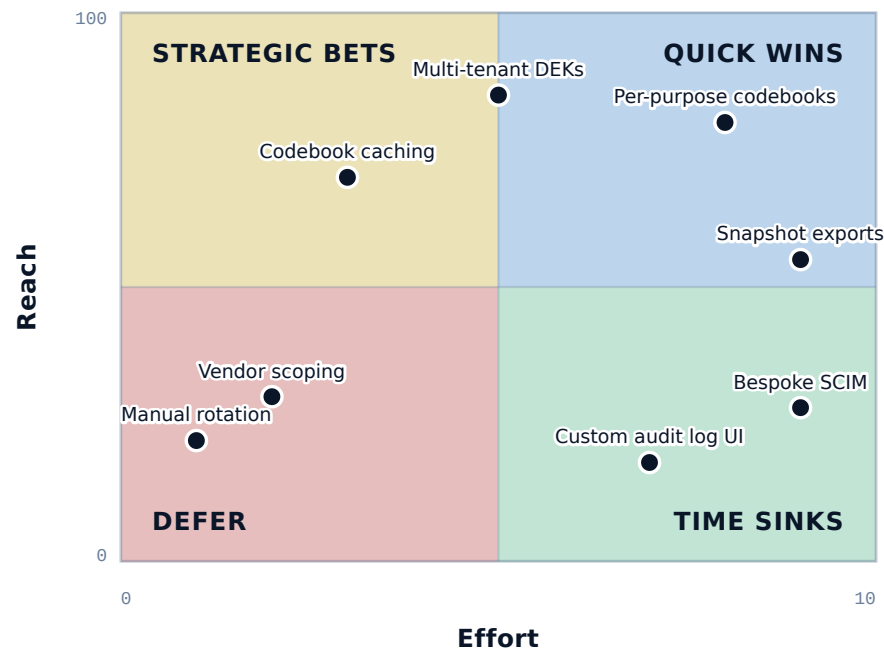

What this deck shows.

A 2×2 quadrant chart authored as a plain nested list — each top-level item is a quadrant label (reading order TL → TR → BL → BR), each nested item is a plotted record `name <code>x, y</code>`. `lib/quadrant.js` parses the list, resolves per-axis scale from the eyebrow (auto-fits when omitted), and emits a positioned SVG at build time. One default plus five modifiers — `bubble`, `trail`, `cohort`, `threshold`, `magic` — each answering a distinct boardroom question. `minimal` and `dark` compose on top of any of them. Palette-blind, deterministic, zero client-side JavaScript.

EFFORT 0-10 → REACH 0-100

Where to put the next dollar.

Effort estimated in story-points; reach as percent of addressable users.

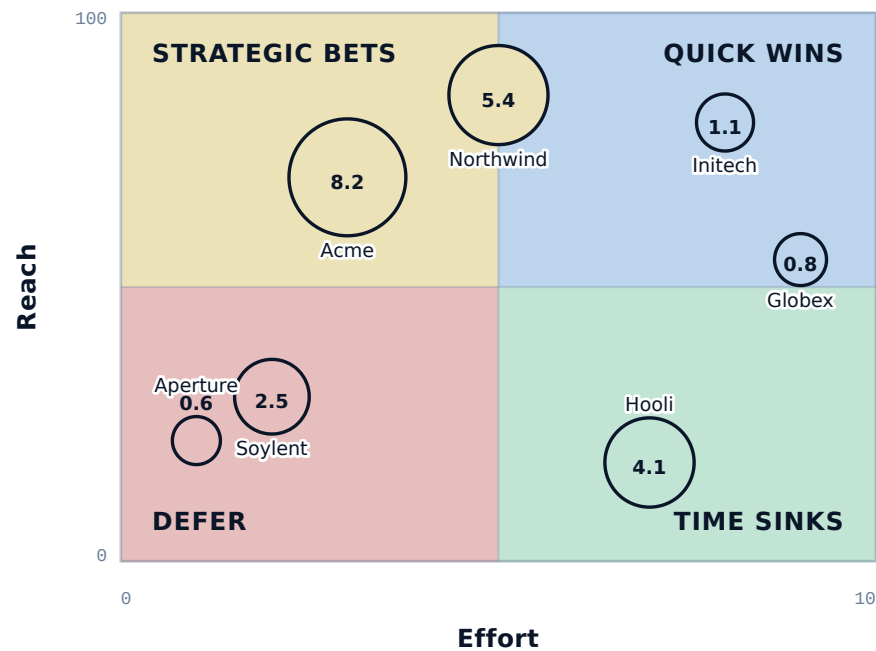

Illustrative · 8 candidate initiatives.

EFFORT 0-10 → REACH 0-100

Where the value sits, sized by deal size.

Bubble area scales with annual contract value, in millions.

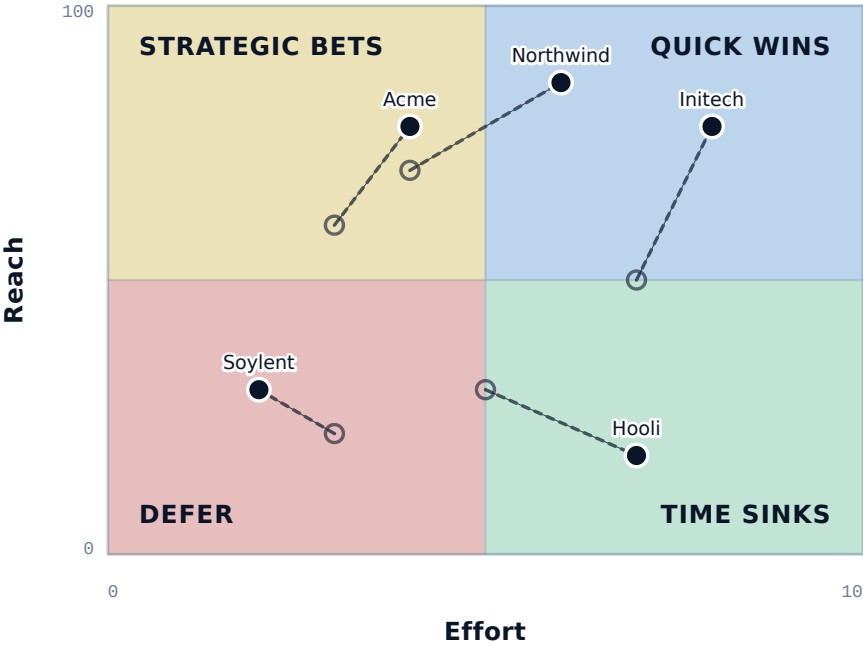

Illustrative · 7 prospects · ACV in USD millions.

EFFORT 0-10 → REACH 0-100

What moved this quarter.

Faded ring is last quarter's position; solid dot is now.

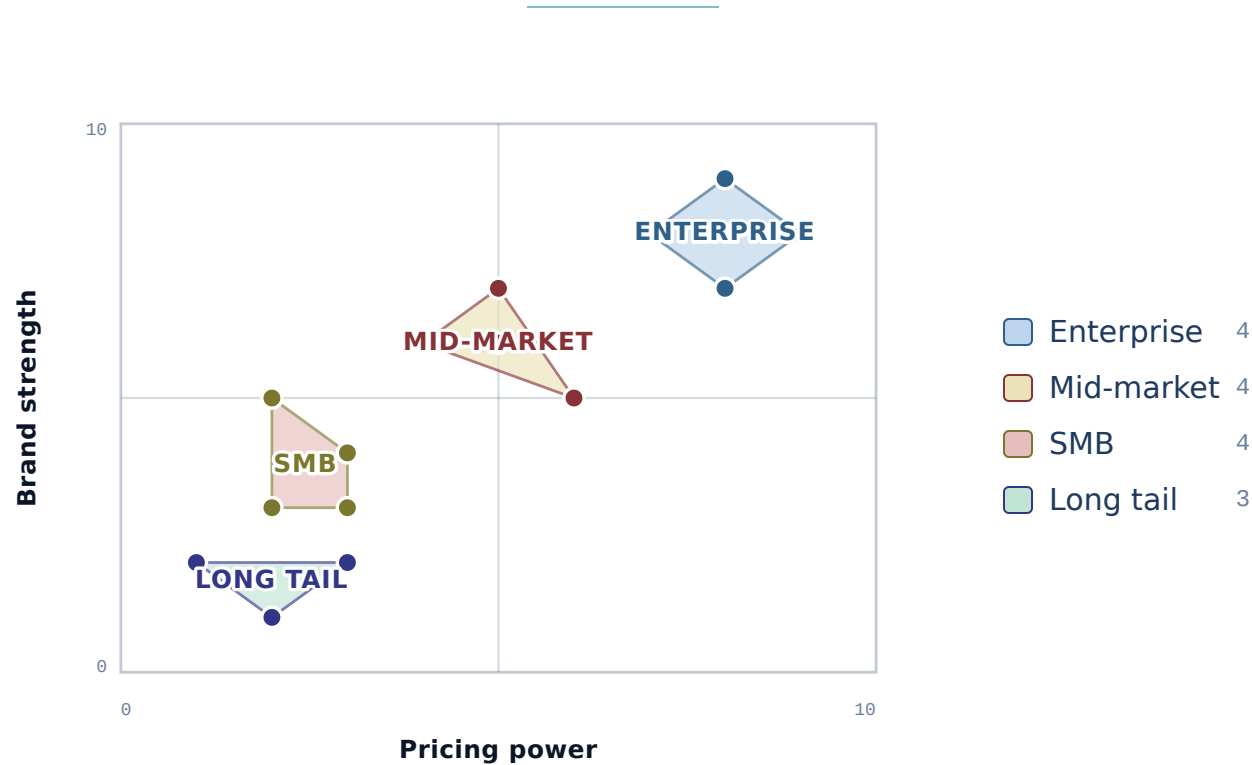

Illustrative · 5 movers · Q3 2025 → Q4 2025.

PRICING POWER → BRAND STRENGTH

Where each segment of the market lives.

Convex hulls per cohort — deterministic geometry, same data → same shape.

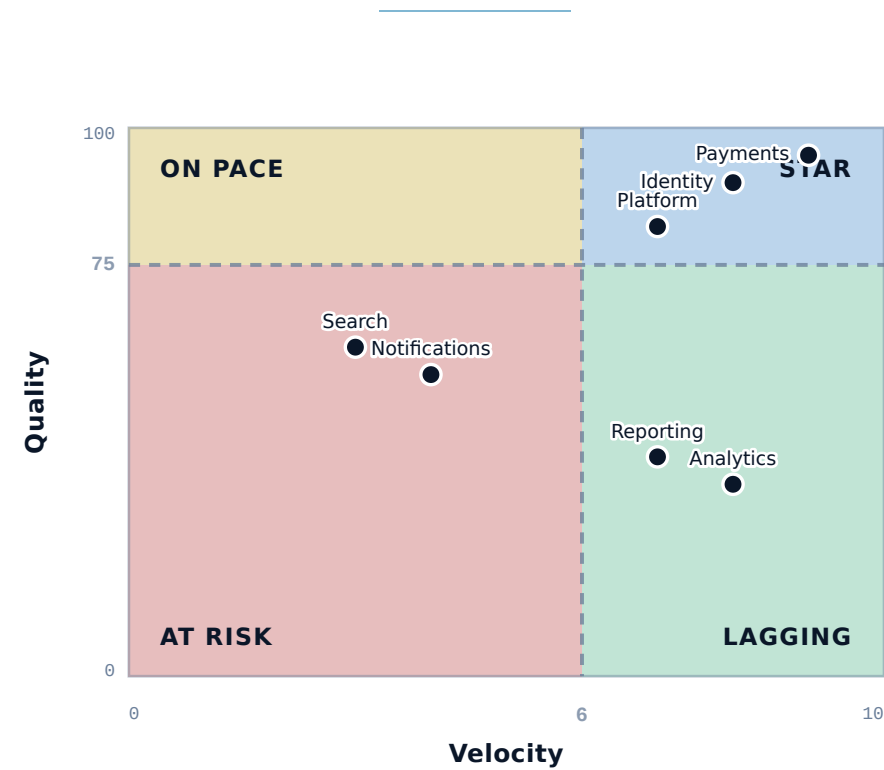

Illustrative · 15 firms · 4 cohorts.

VELOCITY 0-10 → QUALITY 0-100 · TARGETS 6, 75

Who clears both bars.

Both targets pulled from last quarter's OKR review; lines redrawn each cycle.

Illustrative · 7 services · 2026 H1 OKR bar.

COMPLETENESS OF VISION 0-10 → ABILITY TO EXECUTE 0-10

The market read at a glance.

Canonical Gartner labels by default; author-supplied group names take over.

Illustrative · 8 vendors · 2026 market assessment.

LATTICE · FEATURE DECK

Inspect, then merge.

One default and five modifiers. One Markdown source contract.

Palette-blind, deterministic, zero dependencies.
