kanban

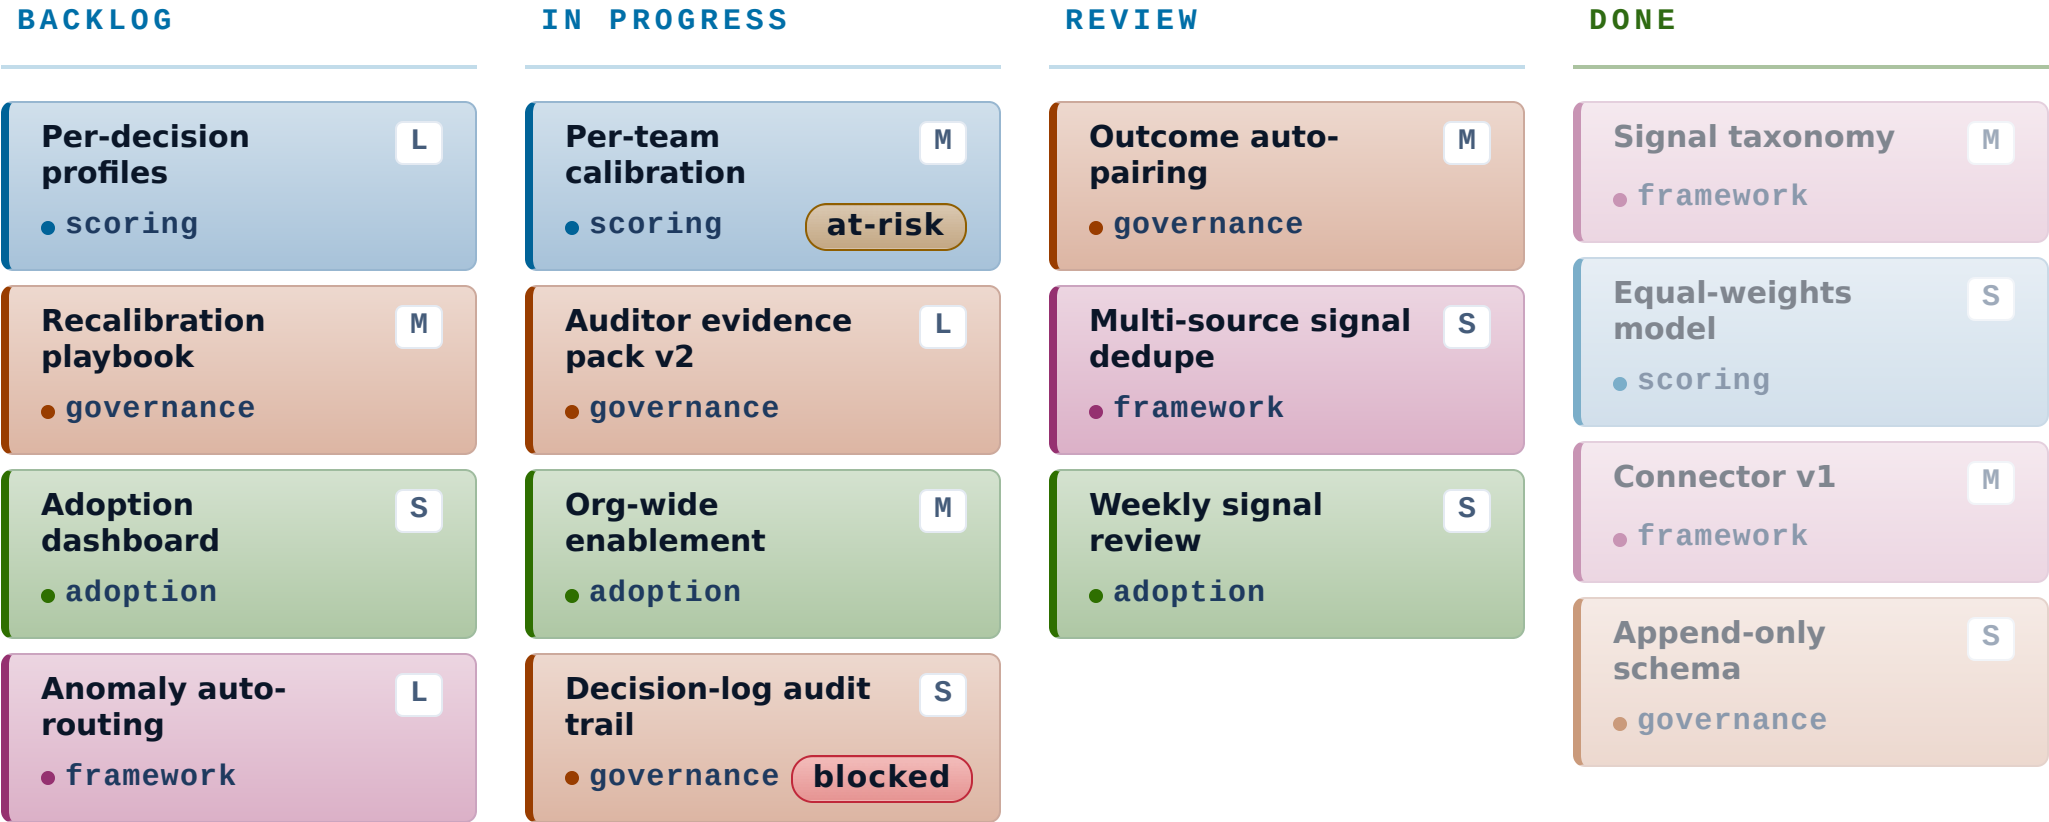

Kanban board — columns of cards by stage.

Where Phase 2 work stands today.

Eight items across four stages; the scoring-model rewrite is the only card flagged at-risk, which is the polite way of saying it is the only one anyone has looked at.

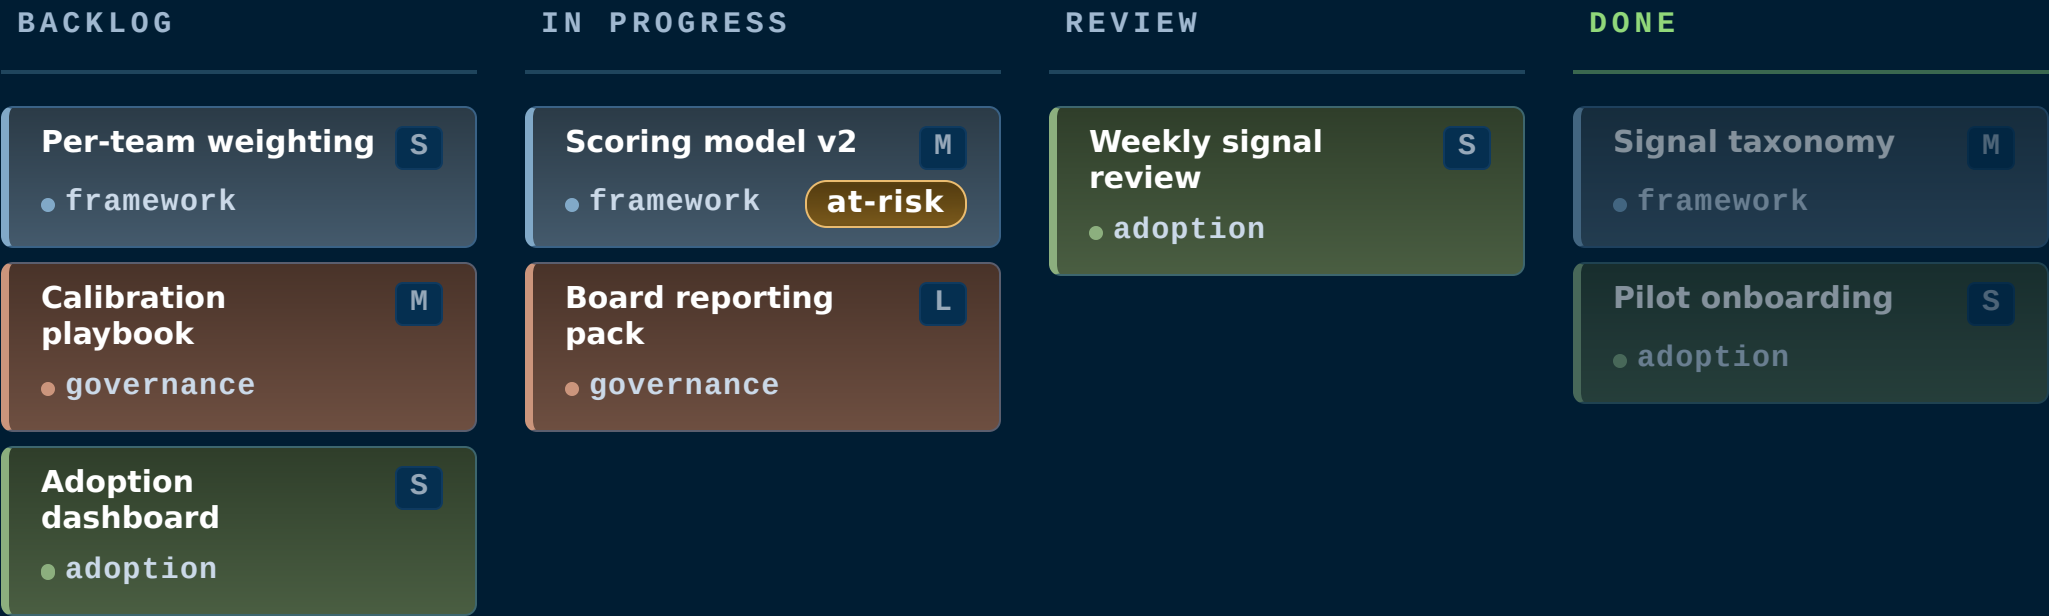

Stress test — four lanes, fifteen cards, and a Backlog that grows faster than Done.

When NOT to reach for kanban.

Schedule, If the question is when each task **not** ships rather than where it sits **status.** today, reach for `gantt` (spans) or `roadmap` (phases). Kanban is a snapshot, not a timeline.

More than five lanes. Past five columns the cards compress and the column headers crowd. Group adjacent stages or split into two boards (e.g. by team) instead.

Cards without meta. A board of bare titles wastes the layout's affordances. Add at least a size badge and a lane label so the audience can scan workload and ownership at a glance.

RELATED COMPONENTS

See also.

- `gantt` — schedule of overlapping tasks across lanes, not current state
- `roadmap` — phased grid of deliverables across workstreams
- `checklist` — single list of items with done/in-flight/planned states
- `verdict-grid` — options scored against shared criteria, not stage-tracked
