Legal layouts — finalists.

Six anchors. Two to three variants each. Lean authoring throughout — slot labels auto-lift via CSS, state markers use the universal `[x]` `[-]` `[ ]` grammar.

WHAT SURVIVED THE CUT

Each anchor ships the strongest variant plus the complements that cover a different content rhythm — never duplicates.

Seventeen variants total instead of thirty. Every kept layout earns its place by serving a content job no sibling can do. Slot labels are auto-bolded by the `slotLabelLift` transform — author writes `- Federal`, not `- Federal`. The obligation matrix uses `[x] [-] [ ]` cells like every other state-marked layout in Lattice.

**The verbatim regulation, in plain

What counts as "personal information" under CCPA.

Cal. Civ. Code §1798.140(o) · CCPA/CPRA

KEY INSIGHT

"Personal information" means information that identifies, relates to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household.

In plain English: any data tied to a household or device, not just a named person — IP addresses, cookie IDs, and device fingerprints are all in scope.

WHAT WE MUST DO

Treat household-level identifiers as PI in our notice, retention, and DSAR workflows. Audit pixel and tag inventory next quarter.

"Personal information" includes the household, not just the person.

What changed in the text we live by?

Cal. Civ. Code §1798.135 · amendment SB-362 (2024)

KEY INSIGHT
