

LATTICE · SOCIAL FORMATS

Boardroom decks, feed- portrait.

Native 4:5 portrait — the most real estate the Instagram and Facebook feed allows.

WHY IT MATTERS

9:16

The aspect ratio that
owns the mobile feed.

Lattice now renders it
natively — no cropping, no
export gymnastics.

THE IDEA

One deck source. Every surface it needs to live on.

Set the *size:* directive in the front matter and the layouts adapt to the taller canvas — type scales up to read at phone distance, content fills the frame instead of clinging to the top.

FORMATS SHIPPED

Four new sizes, one directive.

1:1

SQUARE

4:5

PORTRAIT

9:16

STORY

9:19.5

MOBILE

“

The best deck is the one that meets your audience where they already are — and right now, that's a phone held upright.

”

— SlideWright field notes

SECTION 02

Authoring stays
exactly the
same.

ONE DIRECTIVE

**Pick the canvas with `size:` —
and nothing else moves.**

Set `size:` to `story`, `square`, `portrait` or `mobile` in the front matter. Components, palettes and treatments all work unchanged — the layouts simply adapt to the taller frame.

ONE LINE OF FRONT MATTER –

AND YOU'RE FEED-READY.
