

EVIDENCE • SCATTER • SERIES

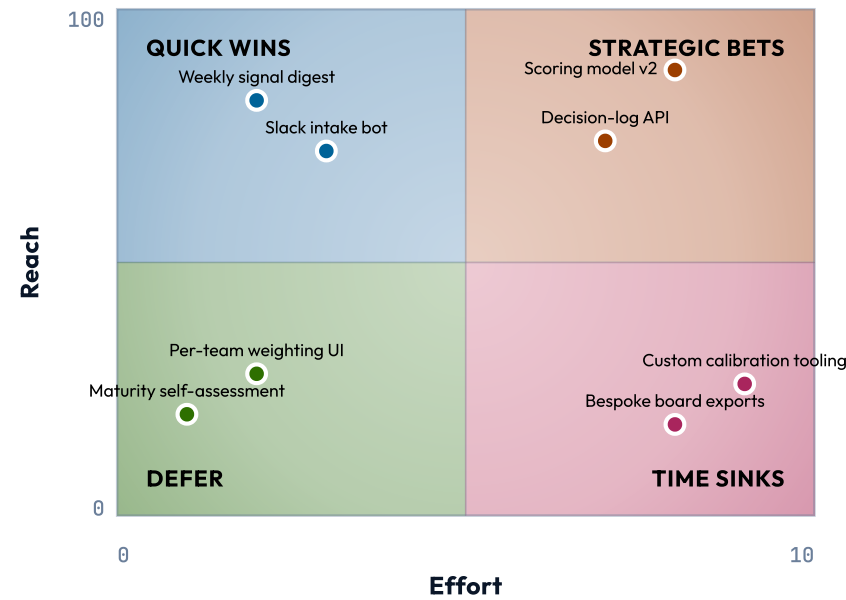

quadrant

Native 2×2 scatter chart — items plotted on two continuous axes.

EFFORT 0-10 → REACH 0-100

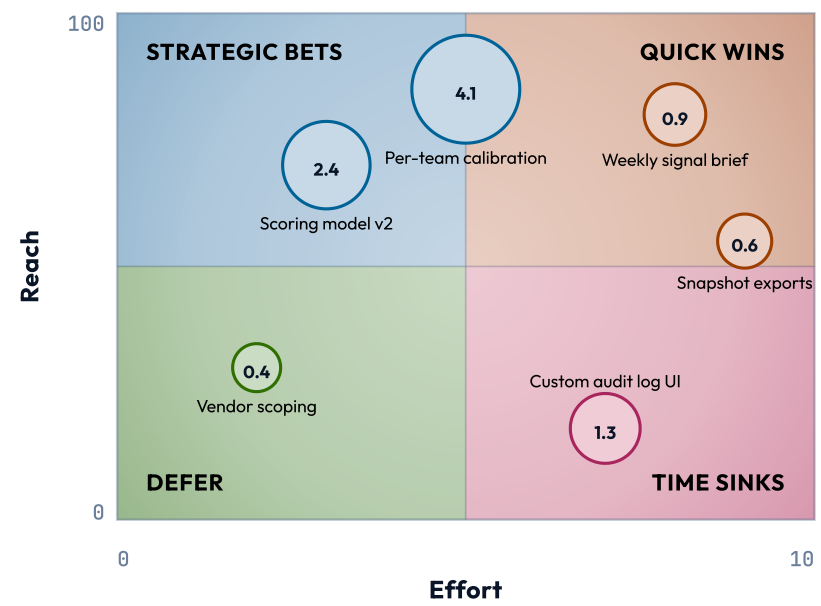

Where to put the next quarter, before someone reorganises the teams again.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

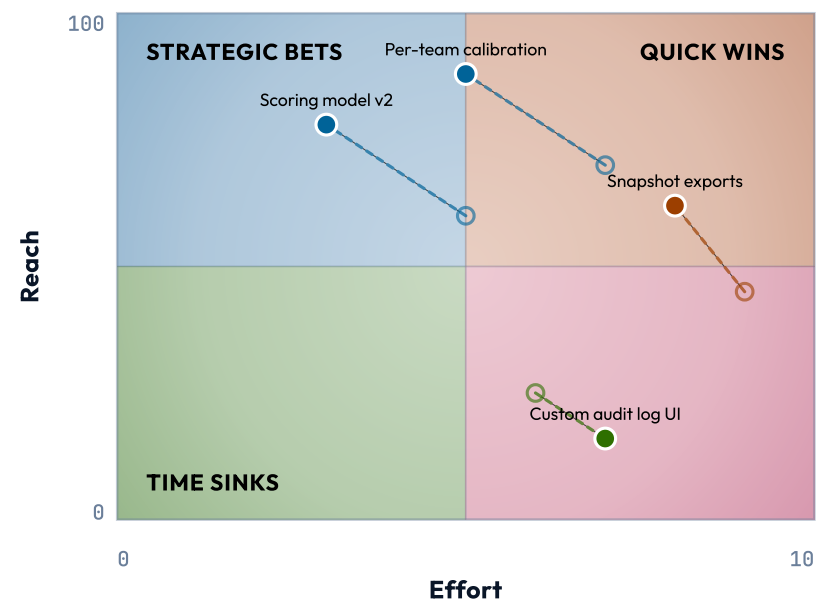

EFFORT 0-10 → REACH 0-100

Where to put the next dollar — sized by revenue nobody has booked yet.

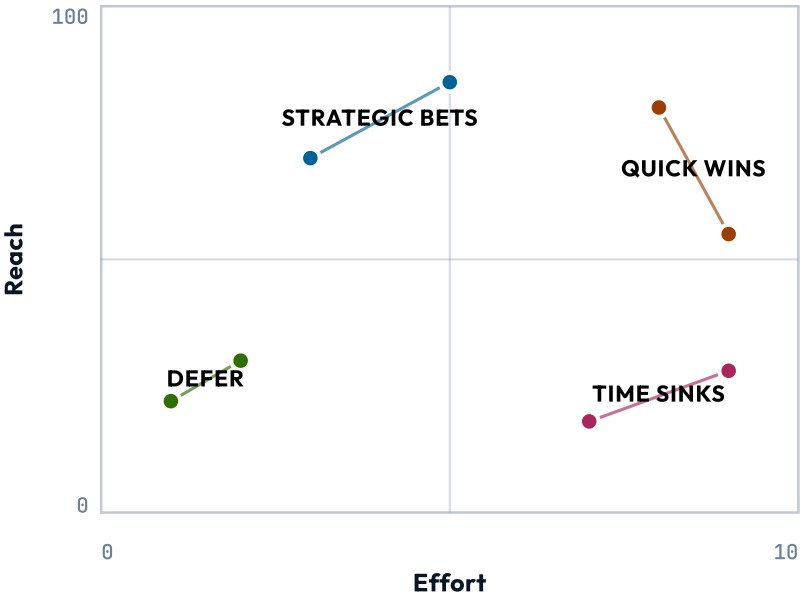

EFFORT 0-10 → REACH 0-100

How each bet moved after one quarter — mostly to the left, where the work is cheaper to describe.

EFFORT 0-10 → REACH 0-100

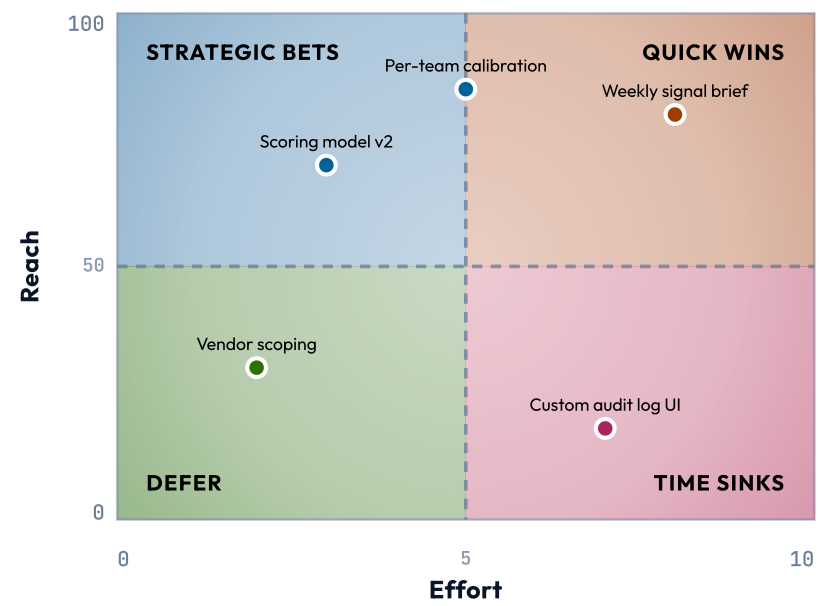

Where to put the next dollar — clustered by theme, themed by whoever owns the slide.

- Strategic Bets 2
- Quick Wins 2
- Defer 2
- Time Sinks 2

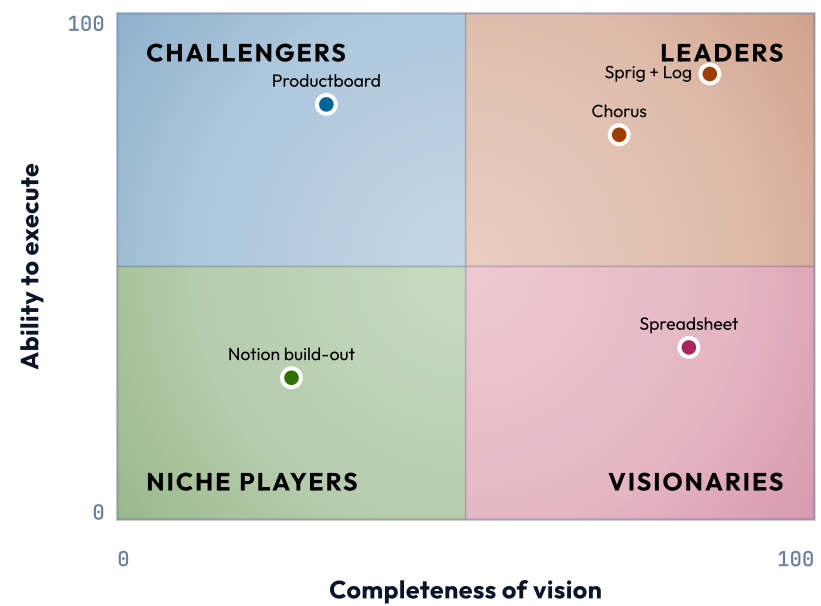

EFFORT 0-10 → REACH 0-100 · TARGETS 5, 50

Against the go/no-go thresholds nobody has agreed to enforce.

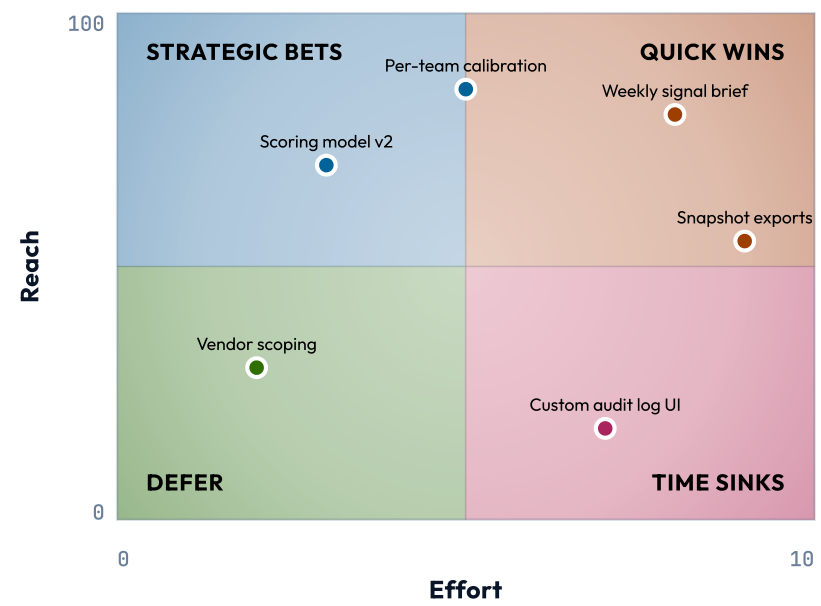

COMPLETENESS OF VISION 0-100 → ABILITY TO EXECUTE 0-100

The decision-tooling Magic Quadrant, in which the tool we built is a Leader.

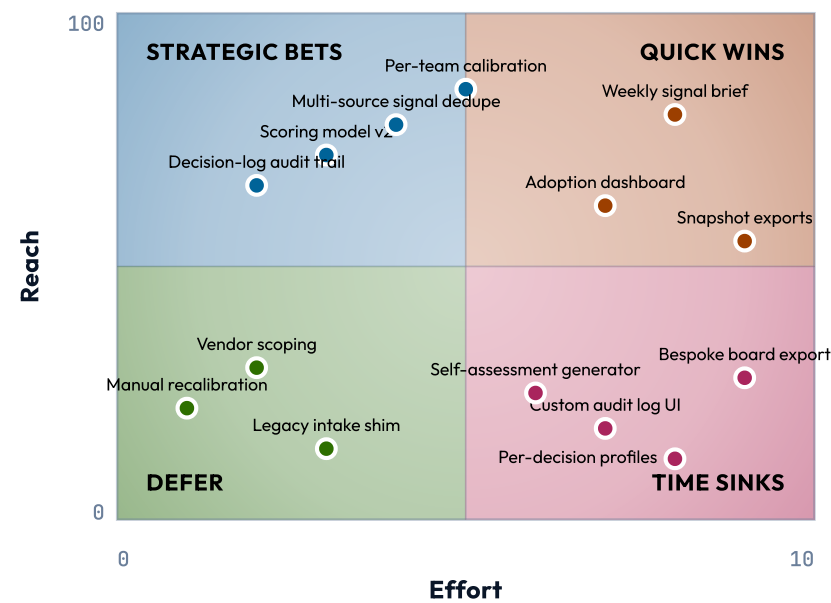

EFFORT 0-10 → REACH 0-100

Where to put the next dollar — unadorned, like the budget that funds it.

EFFORT 0-10 → REACH 0-100

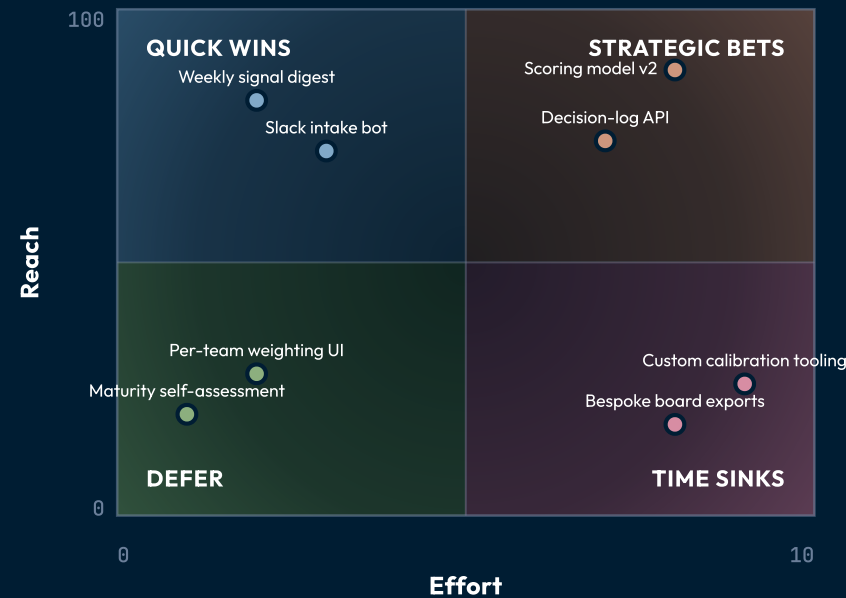

Stress test — fourteen initiatives, dense labels, one owner.

EFFORT 0-10 → REACH 0-100

Where to put the next quarter, before someone reorganises the teams again.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

EFFORT 0-10 → REACH 0-100

Where to put the next quarter, before someone reorganises the teams again.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

EFFORT 0-10 → REACH 0-100

Where to put the next quarter, before someone reorganises the teams again.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

When NOT to reach for quadrant.

Static categorical 2x2.

If the quadrants are fixed labels (Important × Urgent, Build × Buy × Partner × Defer) and items are placed by category not coordinate, use

matrix-
2x2

quadrant

is
data-
driven;

matrix-
2x2

is
conceptual.

Single axis matters.

If one axis is decorative and only the other carries meaning, you have a ranking, not a scatter. Use

progress

for
percent-
complete
or

kpi

for ranked
metrics with
status.

Coordinates without an audience-shared scale.

If 8, 80 requires a footnote to interpret, the slide doesn't pay off. Either label the axis units in the eyebrow (

Effort 0-10 → Reach 0-100

) or normalise to a familiar scale before authoring.

RELATED COMPONENTS
