# checklist

Items with state markers — done, partial, todo.

## Go-live readiness for the framework rollout.

- ✓ Signal taxonomy ratified, in workshop four of three
- ✓ Scoring weights agreed by the steering committee
- ✓ Decision log live in staging
- Pilot teams trained, two still "circling back"
- Operating rhythm on the calendar, attendance optional in practice
- ✗ Exec sponsor confirmed for the launch comms
- ~~🔗 Per-team weighting UI, descoped to next half~~

## When NOT to reach for checklist.

**All-done lists.** If every item is the state decoration. Use `[x]` markers are `list` (or `takeaway` variant) for celebratory recaps; checklist earns its weight when the mix matters.

**Long per-item prose.** Each item is one short line. If a row needs a sentence of explanation, the right home is cards-stack or list-tabular.

**Custom state markers.** Only `[x]`, `[-]`, `[ ]`, and `[/]` (out-of-scope, struck through) map to the mark palette. Authoring `[?]` or `[!]` renders as literal text and breaks the visual contract.

#### RELATED COMPONENTS

## See also.

`list` — items have no state — just bullets

`list-tabular` — rows need a label-plus-description structure, not state

`cards-stack` — each item needs two sentences of body
