

INVENTORY · LEDGER · STRUCTURE

actors

Roster of responsibilities owned by named actors.

Who owns each part of the lifecycle.

Author.

Drafts the deck; owns content and framing.

Reviewer.

Validates clarity, factual accuracy, and audience-fit.

Engineer.

Ensures the build path renders the same PDF Marp preview shows.

Designer.

Owens the visual contract; palette tokens, layout balance, typography.

Operator.

Schedules the briefing; controls the room and the projector.

When NOT to reach for actors.

Process sequence. If the rows describe stages in order, use list-steps or process-flow. actors is for parallel ownership, not handoff sequence.

Long per-actor prose. More than one sentence per row crowds the ledger. Move the detail to a dedicated slide and keep actors as the index.

Roles without names. If the labels are job titles in the abstract ("the engineer"), reach for cards-stack or list. The actors layout earns its weight when the names are named.

RELATED COMPONENTS

- `list-tabular` — rows are reference entries, not owners
- `cards-stack` — each item needs two sentences of body text
- `principles` — stating shared rules rather than per-actor responsibilities
- `glossary` — the left column is a term, not an actor
