

2 COMPONENTS

imagery

Imagery — visuals that carry their own meaning.

Where the next dollar of engineering goes.

Multi-tenant codebooks.

The flagship bet for H2. Drops tokenization latency below 5 ms, scopes any outage to a single tenant, and unblocks the three enterprise deals waiting on a regional-isolation guarantee. Two engineer-quarters, shipping in Q3.

Automated key rotation.

Retires the four-hour maintenance window. One quarter.

Crypto-shred deletion.

Meets the erasure obligation by destroying keys, not hunting records. One quarter.

Examiner audit pack.

Turns a two-week evidence pull into a one-click export. Half a quarter.

Activation is where the trial is won or lost.

Two-thirds of trials that reach the first generated report convert to paid; the ones that stall at workspace setup almost never do. The funnel on the right shows where the drop-off concentrates — in the week-one setup step, not at the price page.
