

6 COMPONENTS

progression

Progression — ordered movement through stages or time.

Customer onboarding · trial to activation.

What a vendor must clear before procurement signs.

01

SOC 2 Type II

A current report with no exceptions in the security or availability criteria.

02

Data residency

Customer data stays in-region; every sub-processor is disclosed and contractually bound.

03

Exit guarantee

Full data export in a documented format, available without opening a support ticket.

04

Breach notification

A 72-hour notice obligation written into the contract, not the marketing page.

05

Uptime history

Twelve months of published status at 99.9% or better, verifiable independently.

What happens in the first hour of an incident.

STEP 01

Declare and page

Whoever notices opens the incident channel and pages on-call. Declaring is cheap; a missed page is not.

STEP 02

Assign a commander

One person owns coordination and communication. They direct the response — they do not debug it.

STEP 03

Stop the bleeding

Mitigate before diagnosing. Roll back, fail over, or shed load first; find the root cause once customers are safe.

STEP 04

Communicate on a clock

A status update every 30 minutes, even when it is "still investigating." Silence is what erodes trust.

What ships in each phase, by workstream.

WORKSTREAM	FOUNDATION	HARDENING	SCALE
	Q2 2026	Q3 2026	Q4 2026
Platform	✔ Codebook signing	🟡 Multi-tenant DEKs	○ Per-purpose codebooks
Operations	✔ Manual rotation	🟡 Automated rotation	○ Crypto-shred
Compliance	✔ Audit trail	✔ Centralised log	○ Examiner pack
SDK	✔ Java	🔧 .NET	○ Polyglot parity

02

Discovery and Scoping

Four weeks. Shared definition of the problem before any solution work begins.

1

Stakeholder Interviews

Eight cross-functional conversations. Open questions only — listening for friction, not confirming assumptions.

2

Current-State Audit

System inventory, workflow documentation, and data-quality review feed a single source-of-truth artefact.

3

Problem Framing Workshop

Half-day session to align on root cause. Output is a ranked problem statement the team signs off on.

4

Scope Confirmation

Written sign-off on what is in, what is out, and what requires a separate decision.

From first pilot to general availability.
