When NOT to reach for kanban.

Schedule, not status. If the question is when each task ships rather than where it sits today, reach for `gantt` (spans) or `roadmap` (phases). Kanban is a snapshot, not a timeline.

More than five lanes. Past five columns the cards compress and the column headers crowd. Group adjacent stages or split into two boards (e.g. by team) instead.

Cards without meta. A board of bare titles wastes the layout's affordances. Add at least a size badge and a lane label so the audience can scan workload and ownership at a glance.

See also.

RELATED COMPONENTS

- `gantt` — schedule of overlapping tasks across lanes, not current state
- `roadmap` — phased grid of deliverables across workstreams
- `checklist` — single list of items with done/in-flight/planned states
- `verdict-grid` — options scored against shared criteria, not stage-tracked
