

IMAGERY · CANVAS · PROSE

image

Image as the slide's anchor, with optional text alongside.

Image right is the default — text leads, evidence follows.

The image fills its half-canvas slot edge-to-edge. A 1px hairline marks the join between text and image — boardroom polish, no placeholder pattern visible behind a real photo. Replace the bg image directive with your own asset.

Full bleed makes the photo the slide.

Text overlays the lower portion on a contrast scrim. Use for openers, closers, or any moment when the image deserves the whole canvas.

Contain preserves the asset's own framing.

Letterboxed against the slide background — useful for plots, dashboards, and screenshots where every pixel of the image matters.

MUSEUM FRAMING GIVES ONE IMAGE THE WALL.

Matte border plus a hairline frame. Reserve for case-study openers, brand moments, archival material — the image that the deck remembers.

Mirror lands the image on the left.

Text leads from the right; image anchors from the left. Use when the surrounding spread reads right-to-left or when the page-turn cue lands on the image side.

Image right is the default — text leads, evidence follows.

The image fills its half-canvas slot edge-to-edge. A 1px hairline marks the join between text and image — boardroom polish, no placeholder pattern visible behind a real photo. Replace the bg image directive with your own asset.

When NOT to reach for image.

Decorative stock photo. A generic photograph of 'people in a meeting' next to a content slide is filler. Use `content` and trust the prose; reserve image for visuals that argue for themselves.

Image too small to read. A diagram or screenshot small enough to fit inside a half-canvas text slot is unreadable from the back of the room. Reach for `image full` or `image contain`, or move the diagram to its own `diagram` slide.

Image with five paragraphs of caption. If the prose dominates and the image is a sidebar, you have a `content` slide that happens to have a photo. Either trust the image (drop the prose) or trust the prose (drop the image).

RELATED COMPONENTS

- `featured` — the recommendation is a card, not an image
- `diagram` — the visual is a Mermaid graph, not a photo or screenshot
- `content` — the slide is mostly prose with one inline visual
- `title` — the image is a bookend hero, not the body of a slide
- `quote` — the slide is a quotation, not an image
