word-cloud

Spiral-packed word cloud — items sized by weight.

What 38 win/loss interviews kept saying, by frequency.

What this branch named, by weight.

A word cloud constellation diagram on a light gray background. The words are arranged in a circular pattern around a central point. The words are: 'function' (purple, top), 'gallery' (small, top right), 'form' (purple, right), 'manifest' (blue, bottom right), 'substance' (small, bottom left), and 'component' (blue, left). The words 'component' and 'manifest' are the largest and most prominent.

function
gallery
component form
substance
manifest

Every term this branch touched.

What this branch named, by weight.

A word cloud visualization on a light gray background. The words are arranged in a horizontal, slightly overlapping manner. The word 'component' is the largest and most central. To its left is 'substance', and below that is 'form'. Above 'component' is 'function'. To the right of 'component' is 'gallery'. Below 'component' is 'manifest', and to its left is 'variant'. The word 'universal' is positioned to the right of 'function'.

function universal

Stress test — 20 terms, raw frequency counts (512 → 5).

What 38 win/loss interviews kept saying, by frequency.

A word cloud visualization of feedback from 38 win/loss interviews. The words are arranged in a rounded rectangular frame. The most prominent word is 'time-to-value' in a large, light blue font. Other significant words include 'onboarding', 'pricing', 'roadmap', 'security', 'integrations', and 'support'. Smaller words like 'contracts' and 'residency' are also visible. The colors of the words vary, with some in white, some in light blue, and some in a darker blue.

onboarding pricing roadmap
contracts
residency
time-to-value
support
integrations security

What 38 win/loss interviews kept saying, by frequency.

A word cloud on a light gray background with rounded corners. The words are of various sizes and colors, representing their frequency. The largest word is 'time-to-value' in blue. Other prominent words include 'onboarding' in olive green, 'pricing' in dark blue, 'security' in dark red, 'integrations' in teal, and 'support' in brown (rotated 90 degrees). Smaller words include 'roadmap', 'contracts', and 'residency'.

When NOT to reach for word-cloud.

Precise comparisons. If the audience needs to know that 'manifest' is 1.6× 'function', the spiral packing actively misleads. Use `progress` or a bar chart where the eye can compare lengths directly.

Two or three words. A three-word cloud is a list with extra steps. Use `stats` for a metric row or `big-number` for a single weighted headline.

Multi-word phrases. Each li should be a single token. Multi-word phrases blow out the layout and crowd the spiral; if your data is phrases, normalise to keywords first or use `quote` for verbatim text.

See also.

RELATED COMPONENTS

`progress` — the weights need precise visual comparison

`stats` — the headline metrics are independent numbers, not a corpus

`piechart` — the items are parts of a whole, not free-form themes

`quote` — the verbatim language matters more than the frequency

`tldr` — the qualitative summary is prose, not a packed cloud
