kanban

Kanban board — columns of cards by stage.

Where Phase 2 work stands today.

Eight items across four stages; the scoring-model rewrite is the only card flagged at-risk, which is the polite way of saying it is the only one anyone has looked at.

BACKLOG	IN PROGRESS	REVIEW	DONE
Per-team weighting framework S	Scoring model v2 framework M at-risk	Weekly signal review adoption S	Signal taxonomy framework M
Calibration playbook governance M	Board reporting pack governance L		Pilot onboarding adoption S
Adoption dashboard adoption S			

Stress test — four lanes, fifteen cards, and a Backlog that grows faster than Done.

BACKLOG	IN PROGRESS	REVIEW	DONE
Per-purpose pack caching platform L	Multi-tenant adapter rotation platform at-risk M	Automated rotation pipeline operations M	Capability-pack signing service platform M
Deprovision runbook operations M	Examiner evidence pack v2 compliance L	Continuous audit trail compliance S	Manual model rotation operations S
Dependency dashboard platform S	Polyglot SDK parity platform M	Incident response runbook operations S	Java and .NET parity platform M
Edge runtime bindings platform L	Centralised examiner log compliance blocked S		Audit trail v1 compliance S

When NOT to reach for kanban.

Schedule, not status. If the question is when each task ships rather than where it sits today, reach for `gantt` (spans) or `roadmap` (phases). Kanban is a snapshot, not a timeline.

More than five lanes. Past five columns the cards compress and the column headers crowd. Group adjacent stages or split into two boards (e.g. by team) instead.

Cards without meta. A board of bare titles wastes the layout's affordances. Add at least a size badge and a lane label so the audience can scan workload and ownership at a glance.

See also.

RELATED COMPONENTS

`gantt` — schedule of overlapping tasks across lanes, not current state

`roadmap` — phased grid of deliverables across workstreams

`checklist` — single list of items with done/in-flight/planned states

`verdict-grid` — options scored against shared criteria, not stage-tracked
