Effective Mar 2026

Q1 motion ranked by exposure.

TOP THREE · BY ARR AT RISK

TIER 1	EU AI Act Title III High-risk system inventory due before April.	Effective Feb 2026
TIER 2	Colorado AI Act SB 24-205 Deployer disclosures required; copy in flight.	Effective Feb 2026
TIER 3	Texas DPSA §541.151 DSAR opt-out portal mandatory.	Effective Mar 2026

When NOT to reach for regulatory-update.

Single rule's lineage. If the slide walks one rule from statute through case, use `authority-chain`. regulatory-update is a period digest.

Past six rows. More than six items compresses the row gap and the citation chips run out of room. Split by jurisdiction.

Missing summary or citation. Each row needs all three sub-items — citation, summary, effective date. Otherwise the row reads as rumour.

See also.

RELATED COMPONENTS

`authority-chain` — single rule walked statute → regulation → guidance → case

`list-criteria` — flat enumeration of requirements without dates or citations

`timeline` — chronological sequence of events on a single axis

`list-tabular` — structured metadata per row but no regulatory framing
