How to add a new component to Lattice.

STEP 01

Scaffold the folder

Create

```
lib/components/<name>/
```

with a manifest declaring name, function, form, substance, slots, and skeleton.

STEP 02

Author the styles

Scope the CSS to the section class.

Use palette tokens

no

STEP 03

Add a transform if needed

Substance

```
structure
```

or

```
series
```

 ships a transform module wired into all three render paths

STEP 04

Demo and document

Author

```

02

Discovery and Scoping

Four weeks. Shared definition of the problem before any solution work begins.

Eight cross-functional conversations. Open questions only — listening for friction, not confirming assumptions.

2

Current-State Audit

System inventory, workflow documentation, and data-quality review feed a single source-of-truth artefact.

3

Problem Framing Workshop

Half-day session to align on root cause. Output is a ranked problem statement the team signs off on.

4

Scope Confirmation

Written sign-off on what is in, what is out,

How a deck moves from draft to share.
