Every growth lever moved forward this year, in the cut of the data we are showing.

# The number behind the quarter, and the one in every headline slide.

\$420M

Annual recurring revenue

*First quarter past the \$400M threshold; up 28% year-over-year and ahead of the FY26 plan by \$18M, which is the figure we will quote until it stops flattering us.*

# When NOT to reach for kpi.

**Decorative pills** without status semantics.

The pills read as status, not trends. Status is assigned by each KPI's row position within the modifier — the engine never reads the pill text — so reserve them for the

). Arbitrary labels land a colour that has nothing to do with the metric.

**More than four KPIs in attention or spotlight.**

highlights the metric that needs the room; monumentalises one number. Past four KPIs the visual hierarchy collapses — split into two slides.

**No targets, no trends.**

If the KPIs carry only current values, the slide is a stats row, not a kpi dashboard. Use stats and reclaim the room.

- `stats` — metric row without targets or status pills
- `big-number` — a single number is the whole argument
- `split-panel` — one KPI with a paragraph of supporting prose
- `progress` — completion percentages across parallel workstreams
- `timeline-list` — milestones in time, not metrics at a moment
