

LATTICE · FEATURE DECK

Five killer roadmap layouts.

Workstream × phase grids that earn the slide.

What this deck shows.

Five table-driven roadmap layouts, all built from the same markdown source contract (workstream column on the left, phase columns to the right). One default plus four modifiers — `status`, `horizons`, `swimlane`, `milestones`. Each modifier adds visual chrome without changing how the table is authored.

LAYOUT · ROADMAP

What ships in each phase, by workstream.

WORKSTREAM	01 PHASE 01	02 PHASE 02	03 PHASE 03
Platform	Codebook signing	Multi-tenant DEKs	Per-purpose codebooks
Operations	Manual rotation	Automated rotation	Crypto-shred
Compliance	Audit trail (HSM)	Centralised log	Examiner pack
SDK	Java	—	Polyglot parity

Workstream column carries a categorical lane stripe; phase headers carry numbered chrome; empty cells render as a thin dash.

LAYOUT · ROADMAP STATUS

Where every workstream lands this quarter.

WORKSTREAM	01 PHASE 01	02 PHASE 02	03 PHASE 03
Platform	SHIPPED Codebook signing	IN FLIGHT Multi-tenant DEKs	PLANNED Per-purpose codebooks
Operations	SHIPPED Manual rotation	IN FLIGHT Automated rotation	PLANNED Crypto-shred
Compliance	SHIPPED Audit trail (HSM)	SHIPPED Centralised log	PLANNED Examiner pack
SDK	SHIPPED Java	OUT OF SCOPE .NET	PLANNED Polyglot parity

[x] shipped, [-] in flight, [] planned, [/] out of scope. Each marker tints the cell and prints a state eyebrow above the content.

LAYOUT · ROADMAP HORIZONS

Now, next, and later — by workstream.

PHASE 01

Now · Q2 2026

COMPLIANCE

Examiner pack

SDK

Polyglot parity

Same source table, transposed into three phase cards. Each card carries the phase eyebrow, the phase title from the header, and the workstream commitments stacked below.

LAYOUT · ROADMAP SWIMLANE

Each workstream as its own track.

WORKSTREAM	01 PHASE 01	02 PHASE 02	03 PHASE 03
Platform	Codebook signing	Multi-tenant DEKs	Per-purpose codebooks
Operations	Manual rotation	Automated rotation	Crypto-shred
Compliance	Audit trail (HSM)	Centralised log	Examiner pack
SDK	Java	—	Polyglot parity

Workstream cell becomes a lane label on its row's categorical ground; phase cells read as outlined cards along the track.

LAYOUT · ROADMAP MILESTONES

Phased rollout against the fiscal calendar.

WORKSTREAM	01 PHASE 01 Q2 2026	02 PHASE 02 Q3 2026	03 PHASE 03 Q4 2026
Platform	Codebook signing	Multi-tenant DEKs	Per-purpose codebooks
Operations	Manual rotation	Automated rotation	Crypto-shred
Compliance	Audit trail (HSM)	Centralised log	Examiner pack
SDK	Java	—	Polyglot parity

Phase headers carry a date subtitle authored with `Q2 2026`. A coloured tick anchors each phase column to the spectrum-gradient timeline beneath the header.

LATTICE · FEATURE DECK

Inspect, then merge.

Five table-driven layouts. One markdown source contract. Palette-blind, theme-portable.
