gantt

Gantt chart — task bars across a date axis.

2026 Q1 → 2026 Q4

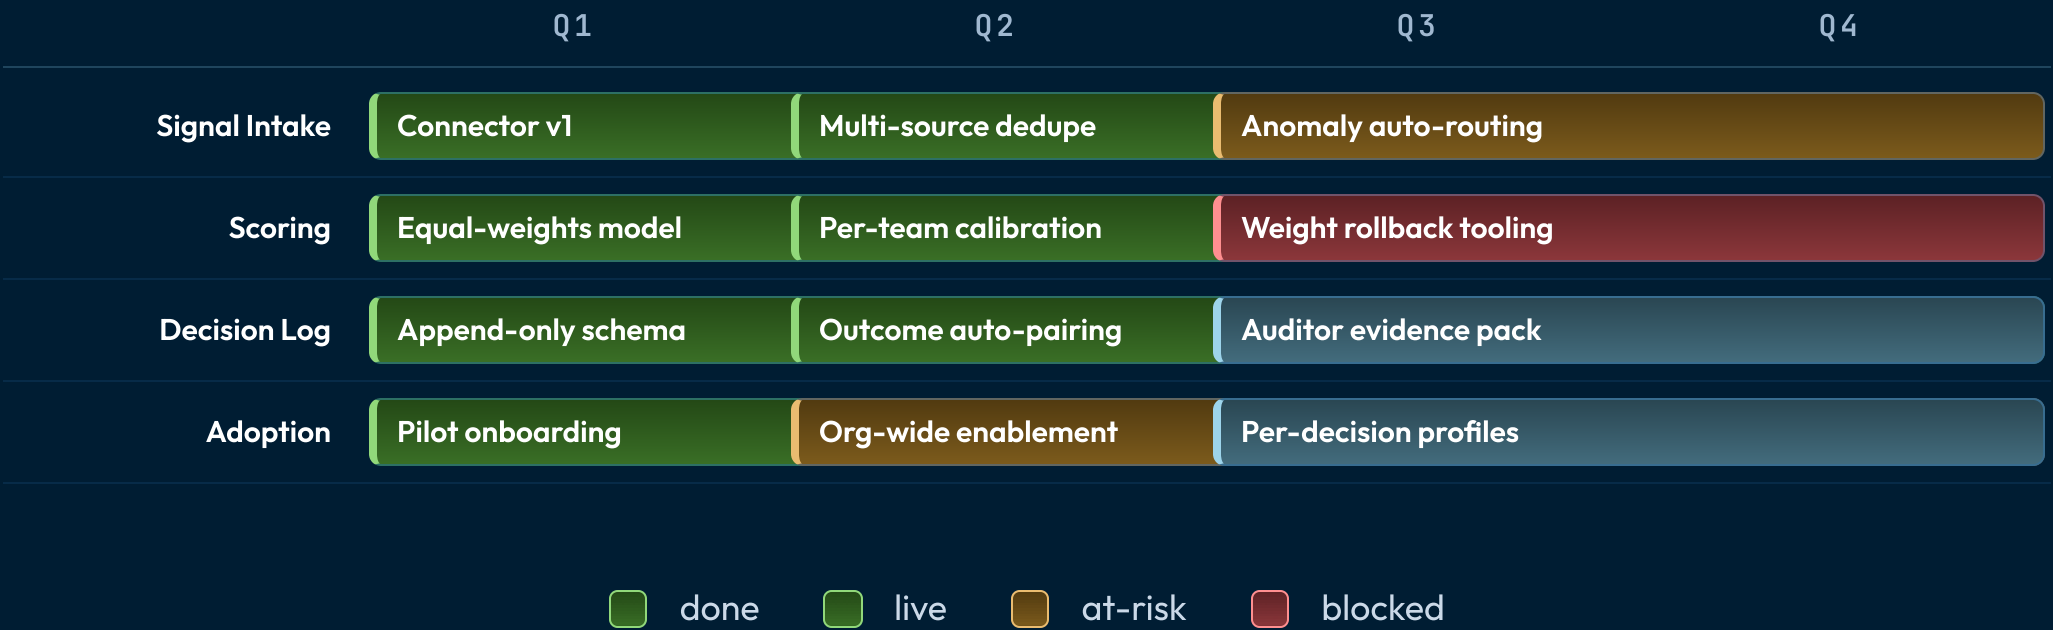

What ships in each phase, by workstream.

Three workstreams across four quarters; the one at-risk bar quietly gates the entire rollout.

2026 Q1 → 2026 Q4

Stress test — four workstreams, twelve tasks, one recalibration bar nobody wants to own.

2026 Q1 → 2026 Q4

What ships in each phase, by workstream.

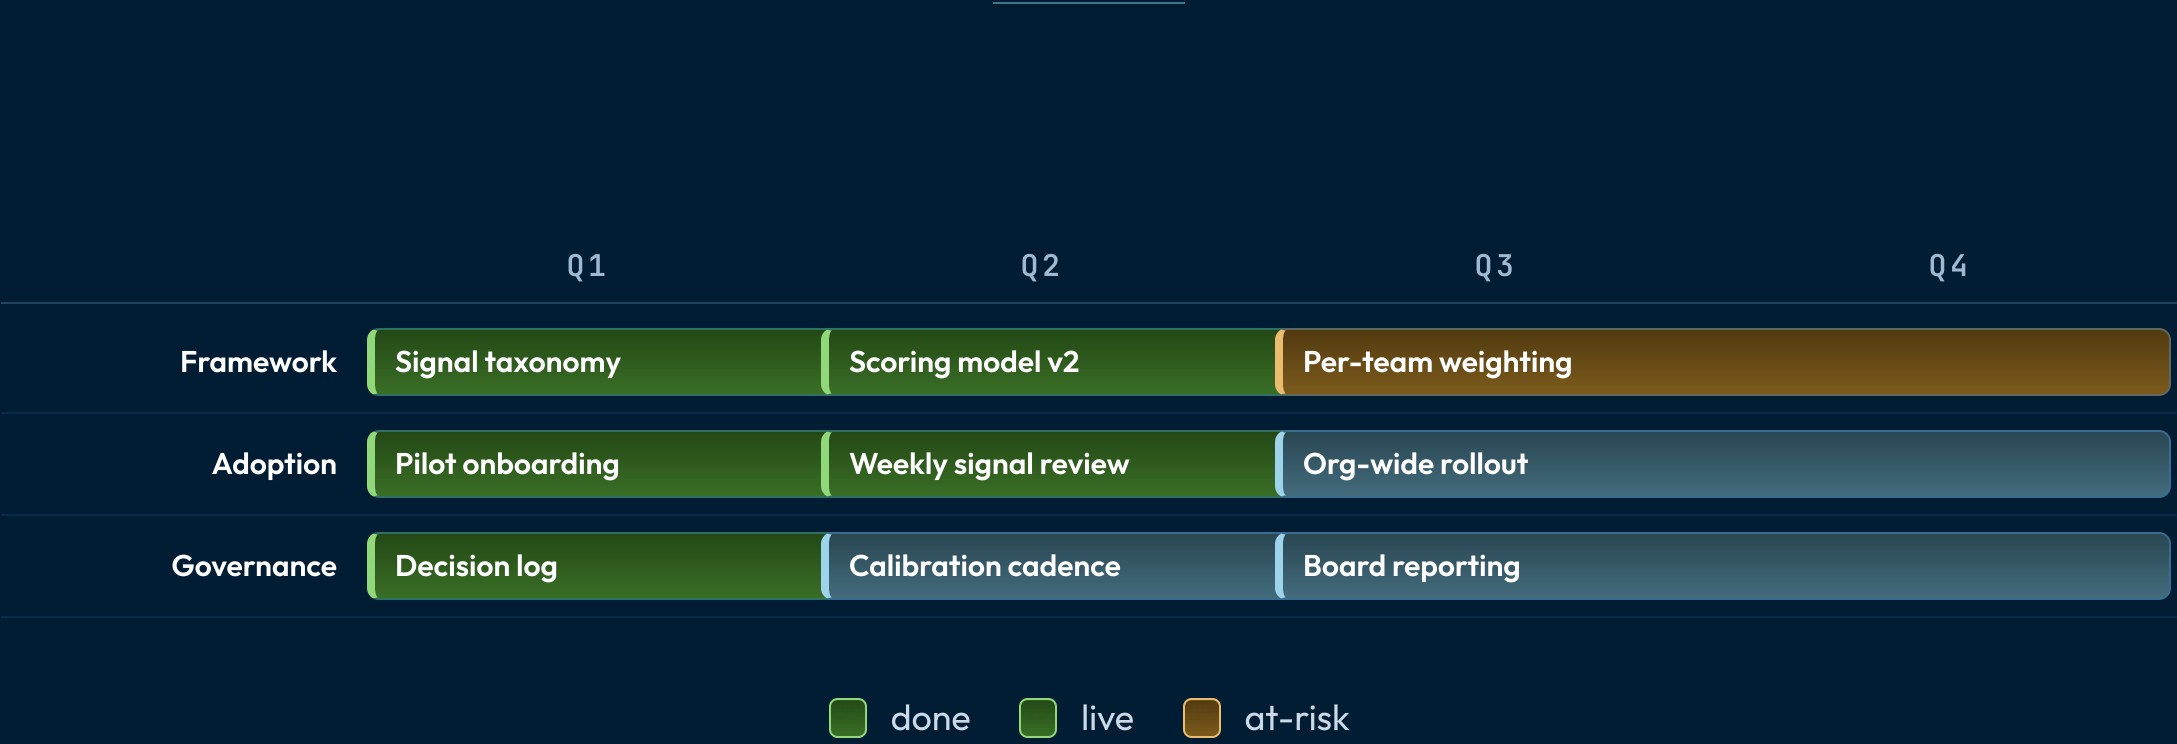

Three workstreams across four quarters; the one at-risk bar quietly gates the entire rollout.

2026 Q1 → 2026 Q4

What ships in each phase, by workstream.

Three workstreams across four quarters; the one at-risk bar quietly gates the entire rollout.

2026 Q1 → 2026 Q4

What ships in each phase, by workstream.

Three workstreams across four quarters; the one at-risk bar quietly gates the entire rollout.

When NOT to reach for gantt.

**Single
workstream.** One lane of bars is a timeline, `timeline` or `list-steps` when there is no parallel work to coordinate.

**More than
five lanes.** Past five workstreams the bars compress and the labels crowd. Group lanes (collapse 'SDK' subdomains into 'SDK') or split into two slides.

**No
spans.** If tasks are point-in-time milestones rather than durations, `timeline` or `roadmap milestones`. gantt earns its chrome only when bars have meaningful length.
