

NEW COMPONENT • INVENTORY • GRID • PROSE

The wall that vouches for you.

A grid of customer, partner, or funder marks — the social-proof slide every go-to-market and mission-driven deck reaches for, now a first-class layout instead of a hand-placed image.

One layout, every industry's proof slide.

The credibility moment shows up everywhere — it just wears a different label. `LOGO-WALL` desaturates the marks to one uniform grey so a loud red brand can't shout out a quiet one, and the wall reads as a single credential.

- Corporate calls it *trusted by*; nonprofits call it *our funders*; government calls it *participating agencies*.
- The `color` variant keeps brand hues for insignia and crests; `dense` packs a longer roster.
- Each mark can carry an optional name and pill below it when the logo alone doesn't say enough.

TRUSTED BY

400+ teams run board prep on Lattice.

TRUSTED BY

When the mark needs a name, give it one.

The same wall, dark-canvas.

LOGO - WALL

Proof, not paragraphs.

When the names carry on sight, let them.

*When they don't, count them with a **big-**
number instead.*
