

IMAGERY · CANVAS · PROSE

image

Image as the slide's anchor, with optional text alongside.

Image right is the default — text leads, evidence follows.

The image fills its half-canvas slot edge-to-edge. A 1px hairline marks the join between text and image — boardroom polish, no placeholder pattern visible behind a real photo. Replace the bg image directive with your own asset.

Text overlays the lower third on a contrast scrim. Use for openers, closers, or any moment when the image deserves the whole canvas.

Full bleed makes the photo the slide.

Contain preserves the asset's own framing.

Letterboxed against the slide background — useful for plots, dashboards, and screenshots where every pixel of the image matters.

Museum framing gives one image the wall.

Matte border plus a hairline frame. Reserve for case-study openers, brand moments, archival material — the image that the deck remembers.

Mirror lands the image on the left.

Text leads from the right; image anchors from the left. Use when the surrounding spread reads right-to-left or when the page-turn cue lands on the image side.

When NOT to reach for image.

content

Decorative stock photo.

A generic and trust the prose; reserve image for photographicals that argue for themselves.

RELATED COMPONENTS

- `featured` — the recommendation is a card, not an image
- `diagram` — the visual is a Mermaid graph, not a photo or screenshot
- `content` — the slide is mostly prose with one inline visual
- `title` — the image is a bookend hero, not the body of a slide
- `quote` — the slide is a quotation, not an image
