

EVIDENCE · SCATTER · SERIES

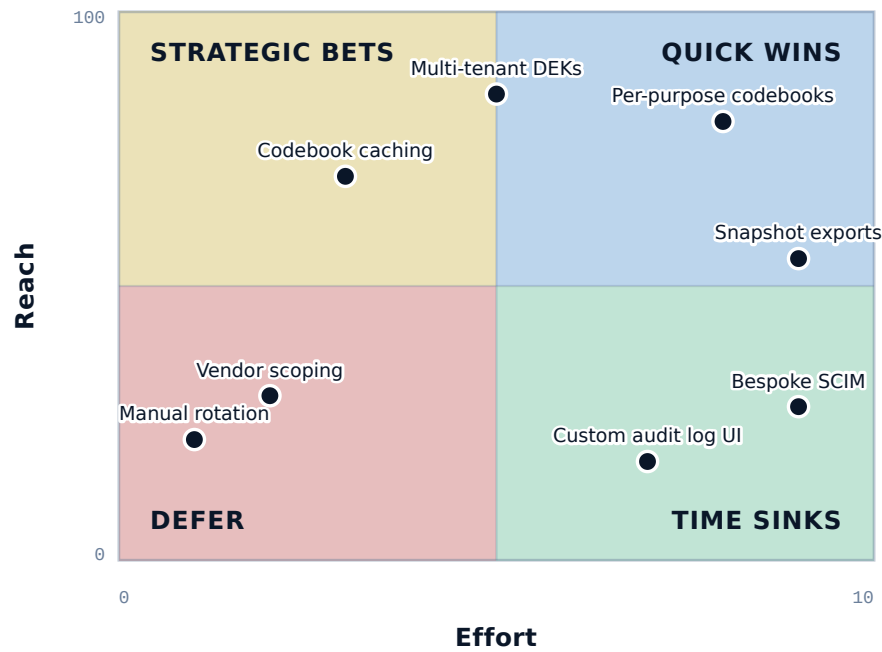

quadrant

Native 2×2 scatter chart — items plotted on two continuous axes.

EFFORT 0-10 → REACH 0-100

Where to put the next dollar.

Effort estimated in story-points; reach as percent of addressable users.

When NOT to reach for quadrant.

matrix-2x2

Static categorical 2×2.

If the quadrants are fixed labels (Important × Urgent, Build × Buy × Partner × Defer) and items are placed by category not coordinate, use is data-driven; is conceptual.

kpi

Single axis matters.

If one axis is decorative and only the other carries meaning, you have a ranking, not a scatter. Use for ranked metrics with status.

Effort 0-10 → Reach 0-100

Coordinates without an audience-shared scale.

If requires a footnote to interpret, the slide doesn't pay off. Either label the axis units in the eyebrow () or normalise to a familiar scale before authoring.

RELATED COMPONENTS

- `matrix-2x2` — the 2×2 is categorical, not coordinate-based
- `radar` — items rated across more than two criteria
- `progress` — percent-complete on a single axis
- `piechart` — part-to-whole, not bivariate position
- `verdict-grid` — comparing options against shared categorical criteria
