

CONTRACT · INVENTORY

One Content, Four Layouts

The next four slides carry the content — same eyebrow, same heading, same four items, same insight. Only the Layout class changes: `layout-ledger` → `layout-cards` → `layout-timeline` → `layout-editorial`. Pure CSS, no re-author.

The system has four moving parts.

01 Signal Intake.

Weekly structured collection across conversations and market data.

02 Scoring Model.

Each signal scored on confidence, recency, and relevance.

03 Decision Log.

Every call recorded with the signals that informed it.

04 Calibration Loop.

Outcomes compared to predictions each cycle.

Signals without decisions are just noise.

Same Content. Four Layouts.

Function held · Form swapped

*Swapping the Layout for fixed Content is
the Form axis moving alone — the contract
guarantees the rest stays put.*
