chart

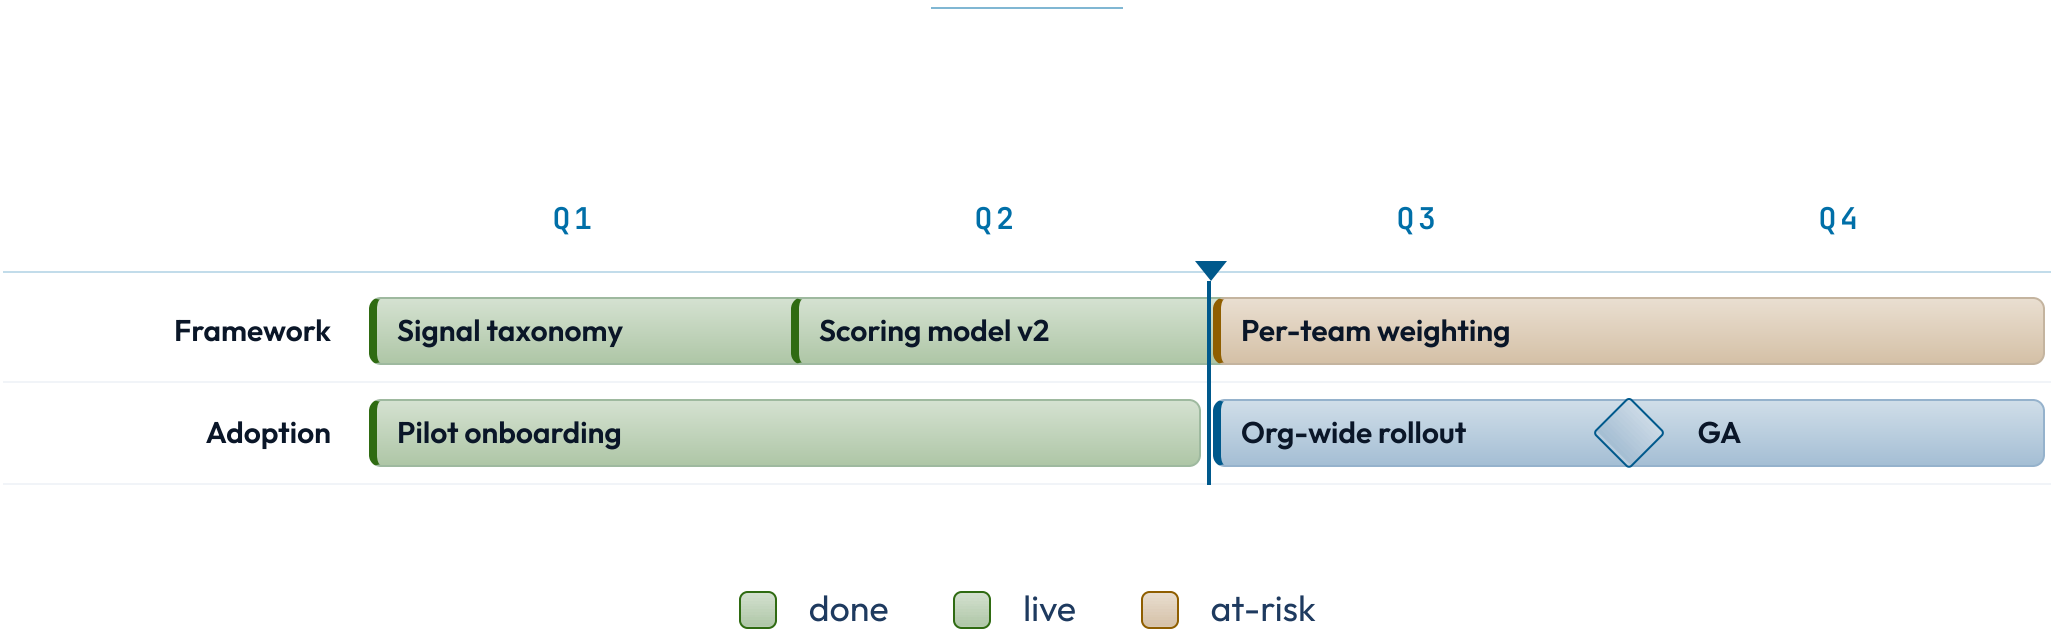

Chart — series-substance data visualizations (SVG kernel).

Where the signup pipeline leaks.

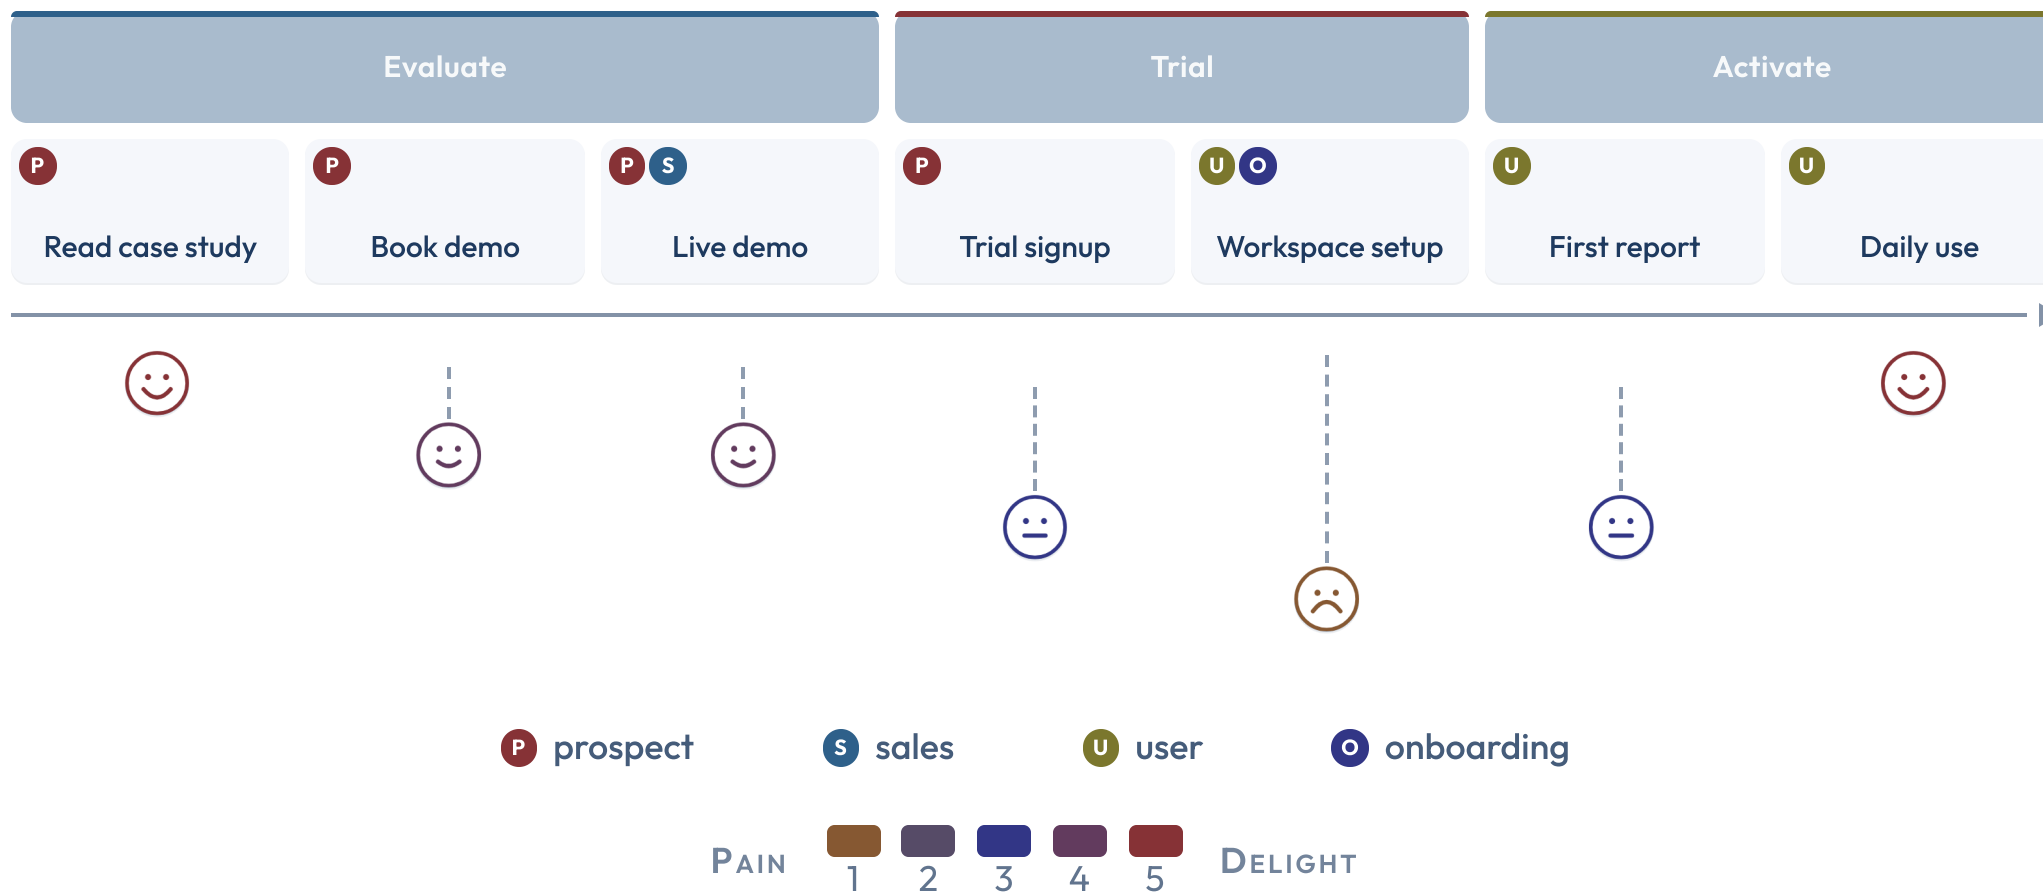

What ships in each phase, by workstream.

Three workstreams across four quarters; the one at-risk bar quietly gates the rollout, GA is a milestone, and the today line marks where the plan stands.

Customer onboarding · trial to activation.

Where Phase 2 work stands today.

Eight items across four stages; the scoring-model rewrite is the only card flagged at-risk, which is the polite way of saying it is the only one anyone has looked at.

Where our programs reached — unevenly.

H1 2026 • 1,840 PERSON-HOURS

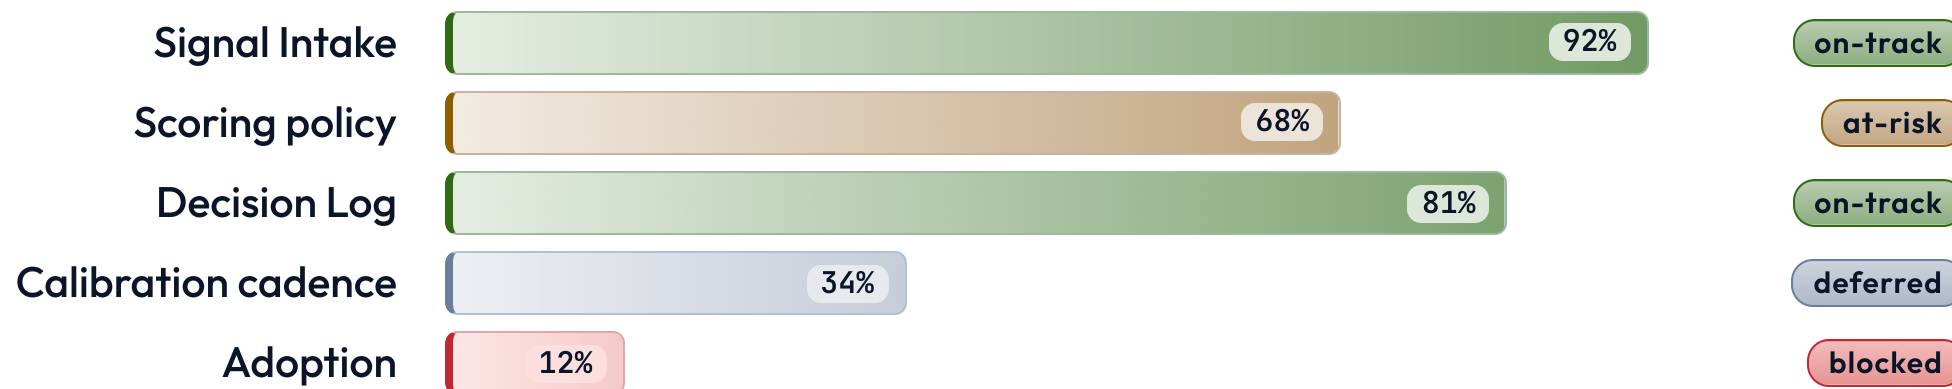

Where the planning quarter actually went.

Nearly half went to producing decks; the deciding itself was the smallest slice.

Phase 1 readiness, by workstream.

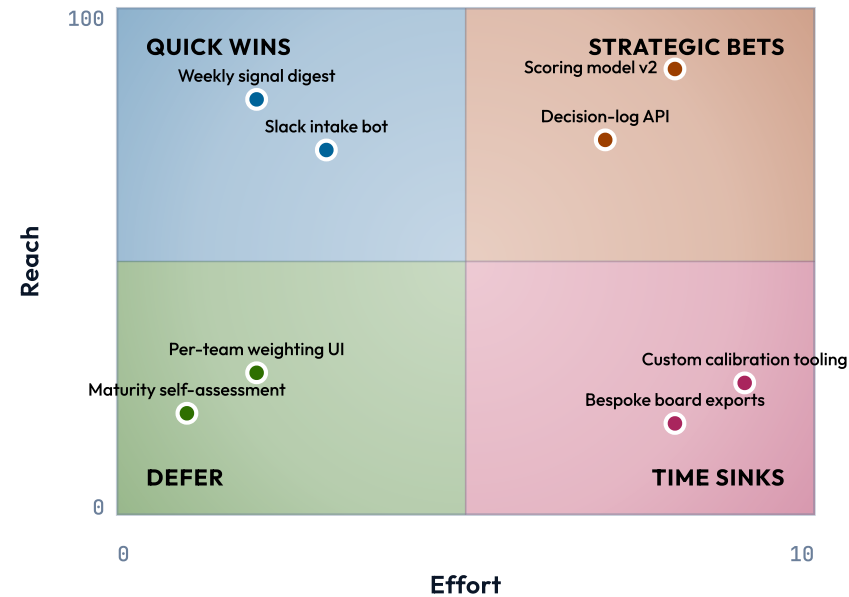

Snapshot at 14:00 UTC. Status pills reflect the most optimistic reading of the available data.

EFFORT 0-10 → REACH 0-100

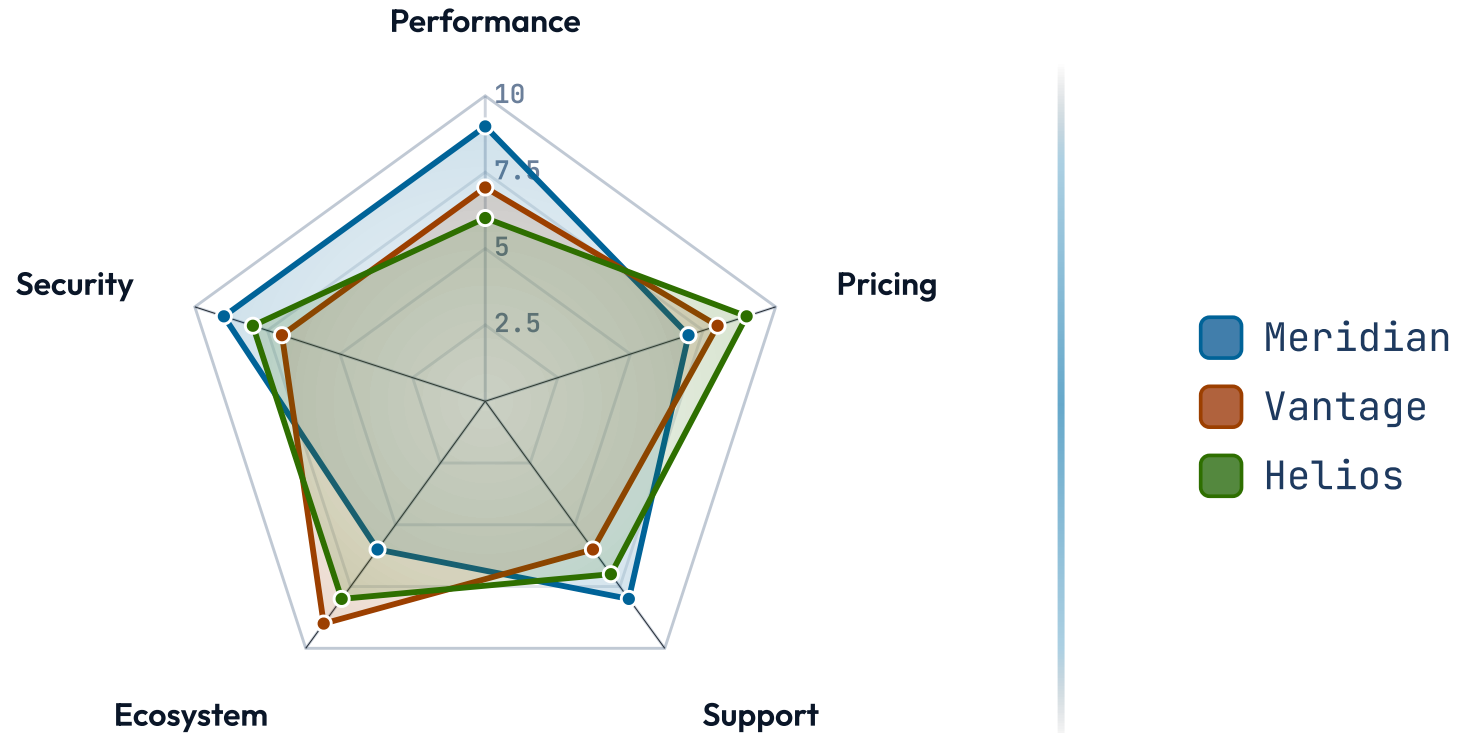

Where to put the next quarter, before someone reorganises the teams again.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

SCALE • 0-10

How we stack up across the buying criteria.

What ships in each phase, assuming the phases survive the next planning offsite.
