## When NOT to reach for kanban.

**Schedule, not status.** If the question is when each task ships rather than where it sits today, reach for `gantt` (spans) or `roadmap` (phases). Kanban is a snapshot, not a timeline.

**More than five lanes.** Past five columns the cards compress and the column headers crowd. Group adjacent stages or split into two boards (e.g. by team) instead.

**Cards without meta.** A board of bare titles wastes the layout's affordances. Add at least a size badge and a lane label so the audience can scan workload and ownership at a glance.

## *RELATED COMPONENTS*

`gantt` — schedule of overlapping tasks across lanes, not current state

`roadmap` — phased grid of deliverables across workstreams

`checklist` — single list of items with done/in-flight/planned states

`verdict-grid` — options scored against shared criteria, not stage-tracked
