word-cloud

Spiral-packed word cloud — items sized by weight.

What 38 win/loss interviews kept saying, by frequency.

A word cloud visualization of feedback from 38 win/loss interviews. The words are arranged in a rounded rectangular frame. The most prominent word is 'time-to-value' in a large, light blue font. Other significant words include 'onboarding' and 'security' in a medium-sized, light yellow font. 'pricing' is in a smaller, light yellow font. 'roadmap' is in a small, light yellow font. 'contracts' and 'residency' are in a very small, light yellow font. 'support' is written vertically on the left side in a small, light yellow font. 'integrations' is in a small, light yellow font.

What this branch named, by weight.

A word cloud constellation diagram on a dark blue background. The words are arranged in a circular pattern, connected by thin lines. The word 'component' is the largest and is colored light blue. The word 'manifest' is the second largest and is also colored light blue. The word 'function' is medium-sized and is colored white. The word 'form' is medium-sized and is colored white. The word 'substance' is the smallest and is colored white. The words are arranged in a circular pattern, with 'component' at the top, 'manifest' at the bottom, 'function' on the left, and 'form' on the right. 'substance' is positioned between 'function' and 'manifest'.

Stress test — 20 terms, raw frequency counts (512 → 5).

What 38 win/loss interviews kept saying, by frequency.

A word cloud visualization of feedback from 38 win/loss interviews. The words are arranged in a rounded rectangular frame. The most prominent word is 'time-to-value' in the center, rendered in a large, light blue font. Other significant words include 'onboarding' (top left, light yellow), 'pricing' (top right, light yellow), 'roadmap' (far right, light yellow), 'contracts' (below roadmap, small, light yellow), 'residency' (below contracts, small, light yellow), 'security' (bottom right, light yellow), 'integrations' (bottom left, light yellow), and 'support' (left side, rotated 90 degrees counter-clockwise, light yellow).

When NOT to reach for word-cloud.

Precise comparisons. If the audience needs to know that 'manifest' is 1.6× 'function', the spiral packing actively misleads. Use `progress` or a bar chart where the eye can compare lengths directly.

Two or three words. A three-word cloud is a list with extra steps. Use `stats` for a metric row or `big-number` for a single weighted headline.

Multi-word phrases. Each li should be a single token. Multi-word phrases blow out the layout and crowd the spiral; if your data is phrases, normalise to keywords first or use `quote` for verbatim text.

See also.

RELATED COMPONENTS

`progress` — the weights need precise visual comparison

`stats` — the headline metrics are independent numbers, not a corpus

`piechart` — the items are parts of a whole, not free-form themes

`quote` — the verbatim language matters more than the frequency

`tldr` — the qualitative summary is prose, not a packed cloud
