word-cloud

Spiral-packed word cloud — items sized by weight.

What 38 win/loss interviews kept saying, by frequency.

A word cloud on a light gray background. The words are of varying sizes and colors. The largest word is 'time-to-value' in blue. Other large words include 'onboarding' in olive green, 'pricing' in dark blue, 'security' in dark red, and 'integrations' in teal. Smaller words include 'support' (vertical, brown), 'roadmap' (dark blue), 'contracts' (small, dark blue), and 'residency' (small, dark blue).

What this branch named, by weight.

A word cloud constellation diagram on a light gray background. The words are arranged in a circular pattern around a central point. The words and their approximate positions are: 'function' at the top, 'component' in the center, 'manifest' at the bottom, 'form' to the right, 'substance' to the left, and 'gallery' to the upper right. The words are in two colors: dark blue and purple. 'component' and 'manifest' are dark blue, while 'function', 'form', 'substance', and 'gallery' are purple.

Every term this branch touched.

What this branch named, by weight.

A word cloud visualization on a light gray background. The words are arranged in a horizontal, slightly overlapping manner. The word 'component' is the largest and most central, rendered in a dark blue color. To its left, 'function' is slightly smaller and in a lighter blue. Below 'function' is 'substance', and below that is 'form'. To the right of 'component' is 'universal', and further right is 'gallery'. Below 'component' is 'variant', and below that is 'manifest'. The words are all in a serif font.

Stress test — 20 terms, raw frequency counts (512 → 5).

What 38 win/loss interviews kept saying, by frequency.

A word cloud visualization of feedback from 38 win/loss interviews. The words are arranged in a rounded rectangular frame. The most prominent word is 'time-to-value' in the center, rendered in a large, light blue font. Other significant words include 'onboarding' (top left, light yellow), 'pricing' (top right, light yellow), 'roadmap' (far right, light yellow), 'contracts' (below roadmap, small, light yellow), 'residency' (below contracts, small, light yellow), 'security' (bottom right, light yellow), 'integrations' (bottom left, light yellow), and 'support' (left side, rotated 90 degrees counter-clockwise, light yellow).

When NOT to reach for word-cloud.

Precise comparisons. If the audience needs to know that 'manifest' is 1.6× 'function', the spiral packing actively misleads. Use `progress` or a bar chart where the eye can compare lengths directly.

Two or three words. A three-word cloud is a list with extra steps. Use `stats` for a metric row or `big-number` for a single weighted headline.

Multi-word phrases. Each li should be a single token. Multi-word phrases blow out the layout and crowd the spiral; if your data is phrases, normalise to keywords first or use `quote` for verbatim text.

See also.

RELATED COMPONENTS

`progress` — the weights need precise visual comparison

`stats` — the headline metrics are independent numbers, not a corpus

`piechart` — the items are parts of a whole, not free-form themes

`quote` — the verbatim language matters more than the frequency

`tldr` — the qualitative summary is prose, not a packed cloud
