

6 COMPONENTS

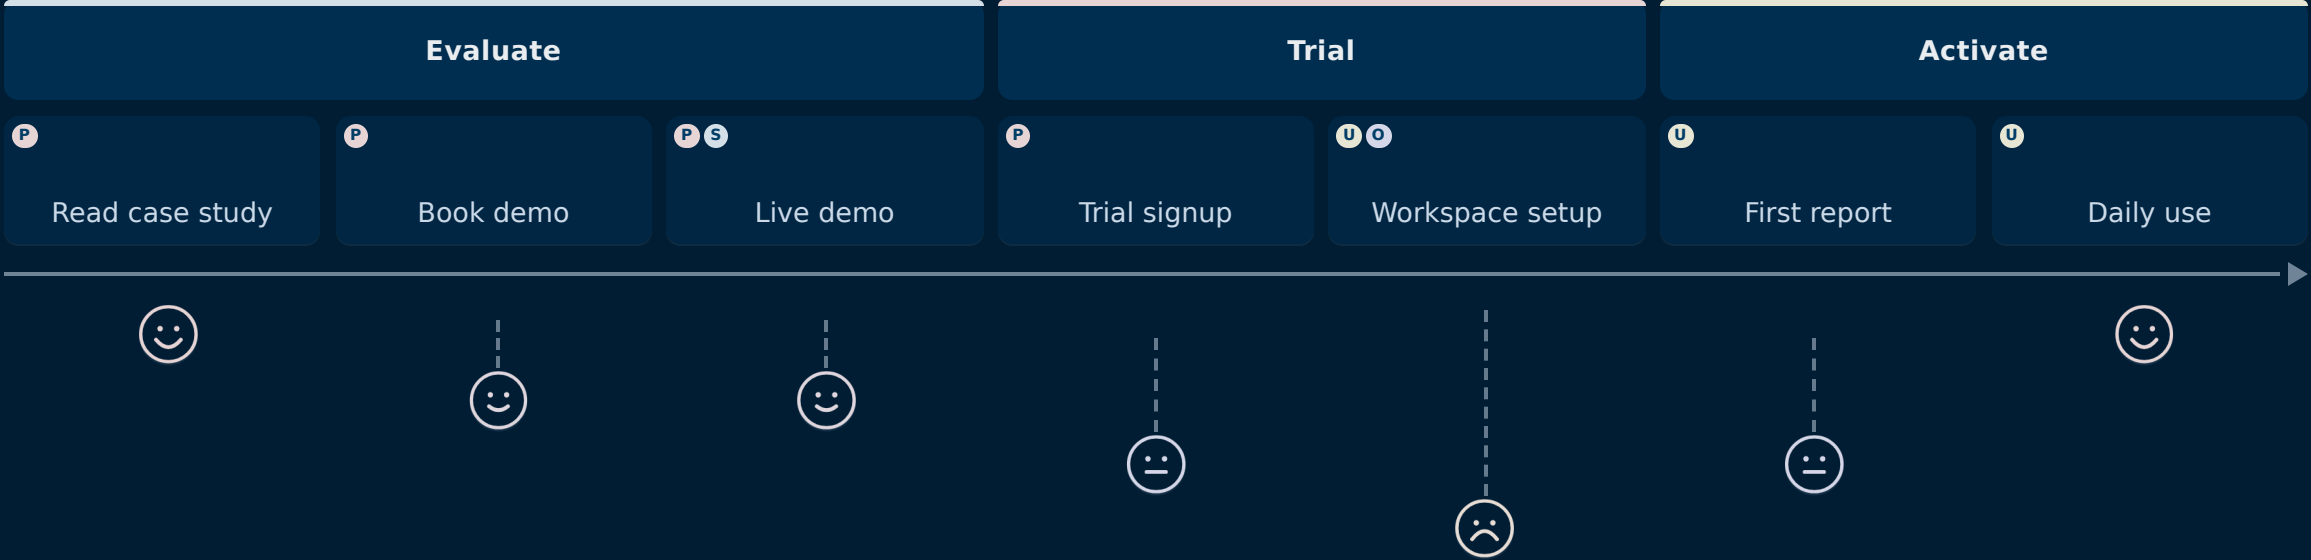

progression

Progression — ordered movement through stages or time.

Customer onboarding · trial to activation.

P prospect **S** sales **U** user **O** onboarding

PAIN 1 2 3 4 5 **DELIGHT**

What a vendor must clear before procurement signs.

01

SOC 2 Type II

A current report with no exceptions in the security or availability criteria.

02

Data residency

Customer data stays in-region; every sub-processor is disclosed and contractually bound.

03

Exit guarantee

Full data export in a documented format, available without opening a support ticket.

04

Breach notification

A 72-hour notice obligation written into the contract, not the marketing page.

05

Uptime history

Twelve months of published status at 99.9% or better, verifiable independently.

What happens in the first hour of an incident, in theory.

STEP 01

Declare and page

Whoever notices opens the incident channel and pages on-call. Declaring is cheap; a missed page is the line item in the post-mortem.

STEP 02

Assign a commander

One person owns coordination and communication. They direct the response — they do not debug it, though they will be asked why they aren't.

STEP 03

Stop the bleeding

Mitigate before diagnosing. Roll back, fail over, or shed load first; find the root cause once customers are safe and the board has logged off.

STEP 04

Communicate on a clock

A status update every 30 minutes, even when it is "still investigating." Silence is what the retrospective remembers.

What ships in each phase, assuming the phases survive the next planning offsite.

WORKSTREAM	FOUNDATION		HARDENING		SCALE	
	Q2 2026		Q3 2026		Q4 2026	
Framework	Signal taxonomy		Scoring model v2		Per-team weighting	
Adoption	Pilot onboarding		Weekly signal review		Org-wide rollout	
Governance	Decision log		Calibration cadence		Board reporting	
Tooling	Intake form		Dashboards		Self-serve exports	

02

Discovery and Scoping

Four weeks. Shared definition of the problem before any solution work begins.

1

Stakeholder Interviews

Eight cross-functional conversations. Open questions only — listening for friction, not confirming assumptions.

2

Current-State Audit

System inventory, workflow documentation, and data-quality review feed a single source-of-truth artefact.

3

Problem Framing Workshop

Half-day session to align on root cause. Output is a ranked problem statement the team signs off on.

4

Scope Confirmation

Written sign-off on what is in, what is out, and what requires a separate decision.

From first pilot to general availability.
