When NOT to reach for divider.

More than five per deck. Each divider is a hard context switch. Too many dilutes the signal and slows the audience. Group related content under fewer sections instead.

Section title that doesn't earn a section. If the next 3-4 slides aren't a coherent unit, the `light` variant (bright canvas, centered) is the right tool. Reserve the dark divider for genuine section starts.

Header or footer overrides. Don't reinstate `_header:` or `_footer:` on a divider. The dark canvas is meant to be uninterrupted; chrome belongs on body slides.
