

6 COMPONENTS

statement

Statement — one declarative claim per slide.

AUDIENCE RECALL

92%

of the audience remembers a
single number from a deck. Make
it count.

The catch-all prose slide.

Use *CONTENT* when no more specific component fits. A heading, a paragraph, optionally a short bullet list. Keep the slide under forty words.

For lists of items, prefer `list`, `cards-grid`, or `cards-stack`.

For comparisons, prefer `compare-prose` or `compare-table`.

For single metrics, prefer `big-number` or `stats`.

“

The signal was always there. We just didn't have a system that forced us to look at it before we'd already decided.

”

— Head of Product, Pilot Team 3

Q2 PERFORMANCE REVIEW

Enterprise revenue stalled in Q2.

Three structural factors explain 90% of the shortfall — all addressable before Q4 close.

Renewal pricing complexity is driving churn at the segment ceiling.

Four accounts totaling \$2.1M ARR declined renewal. Win/loss interviews point to a quote-to-contract gap, not value perception.

Pipeline conversion dropped 11 pp below Q1 — legal review is the chokepoint.

Contract length increased 18 days on average. Root cause is a security addendum introduced in March.

Competitive displacement accelerated in the \$80-200K ACV tier.

Seven losses to a single competitor. Time-to-value gap is the exposure.

A featured statement on the left lands the argument.

Use when

One claim deserves emphasis

The panel headline carries the weight; the right side substantiates.

You need both a thesis and proof

Statement on the left, evidence list on the right.

The right side is short

Three to four supporting points; longer lists belong in cards-stack.

The mirror modifier flips it

Image-style decks often want the panel on the right.

The best product does not win. The most understood product does.

Morgan Chase · Head of Product,
Vercel, 2024

Clarity is a product decision, not a marketing one.

If a prospect cannot articulate our value in one sentence, the product has a communication architecture problem.

Onboarding is the product's first argument for itself.

The moment a user first succeeds defines their frame for everything that follows.

Understanding, not delight, is the retention driver at scale.

Users who understand the system's logic stay through friction. Build for comprehension.
