# How to add a new component to Lattice.

## STEP 01

### Scaffold the folder

Create

```
lib/components/<name>/
```

with a manifest declaring name, function, form, substance, slots, and skeleton.

## STEP 02

### Author the styles

Scope the CSS to the section class.

Use palette tokens

no

## STEP 03

### Add a transform if needed

Substance

```
structure
```

or 

```
series
```

 ships a transform module wired into all three render paths

## STEP 04

### Demo and document

Author

```
<name>.example.md
```

and enrich the manifest with sample, whenToUse, antiPatterns, and related. The generator emits the docs and

What ships in each phase, by workstream.

| WORKSTREAM | FOUNDATION         | HARDENING            | SCALE                   |
|------------|--------------------|----------------------|-------------------------|
|            | Q2 2026            | Q3 2026              | Q4 2026                 |
| Platform   | ✔ Codebook signing | 🟡 Multi-tenant DEKs  | ○ Per-purpose codebooks |
| Operations | ✔ Manual rotation  | 🟡 Automated rotation | ○ Crypto-shred          |
| Compliance | ✔ Audit trail      | ✔ Centralised log    | ○ Examiner pack         |
| SDK        | ✔ Java             | 🔧 .NET               | ○ Polyglot parity       |

# 02

## Discovery and Scoping

Four weeks. Shared definition of the problem before any solution work begins.

Eight cross-functional conversations. Open questions only — listening for friction, not confirming assumptions.

2

### Current-State Audit

System inventory, workflow documentation, and data-quality review feed a single source-of-truth artefact.

3

### Problem Framing Workshop

Half-day session to align on root cause. Output is a ranked problem statement the team signs off on.

4

### Scope Confirmation

Written sign-off on what is in, what is out,

# How a deck moves from draft to share.
