word-cloud

Spiral-packed word cloud — items sized by weight.

What 38 win/loss interviews kept saying, by frequency.

What this branch named, by weight.

A word cloud constellation diagram on a light gray background. The words are arranged in a circular pattern around a central point. The words are: 'function' (purple, top), 'gallery' (small, top right), 'form' (purple, right), 'manifest' (blue, bottom right), 'substance' (small, bottom left), and 'component' (blue, left). The words 'component' and 'manifest' are the largest, while 'substance' and 'gallery' are the smallest.

manifest

Stress test — 20 terms, raw frequency counts (512 → 5).

What 38 win/loss interviews kept saying, by frequency.

A word cloud visualization of 38 win/loss interviews. The words are arranged in a rounded rectangular frame. The most prominent word is 'time-to-value' in a large, light blue font. Other words include 'onboarding', 'pricing', 'roadmap', 'support', 'contracts', 'residency', 'integrations', and 'security'. The words are in various sizes and colors (white, light blue, and dark blue) to represent their frequency.

onboarding pricing roadmap
support contracts

When NOT to reach for word-cloud.

Precise comparisons. If the audience needs to know that 'manifest' is 1.6× 'function', the spiral packing actively misleads. Use `progress` or a bar chart where the eye can compare lengths directly.

Two or three words. A three-word cloud is a list with extra steps. Use `stats` for a metric row or `big-number` for a single weighted headline.

Multi-word phrases. Each li should be a single token. Multi-word phrases blow out the layout and crowd the spiral; if your data is phrases, normalise to keywords first or use `quote` for verbatim text.

See also.

RELATED COMPONENTS

`progress` — the weights need precise visual comparison

`stats` — the headline metrics are independent numbers, not a corpus

`piechart` — the items are parts of a whole, not free-form themes

`quote` — the verbatim language matters more than the frequency

`tldr` — the qualitative summary is prose, not a packed cloud
