kanban

Kanban board — columns of cards by stage.

Where Phase 2 work stands today.

Eight items across four stages; the scoring-model rewrite is the only card flagged at-risk, which is the polite way of saying it is the only one anyone has looked at.

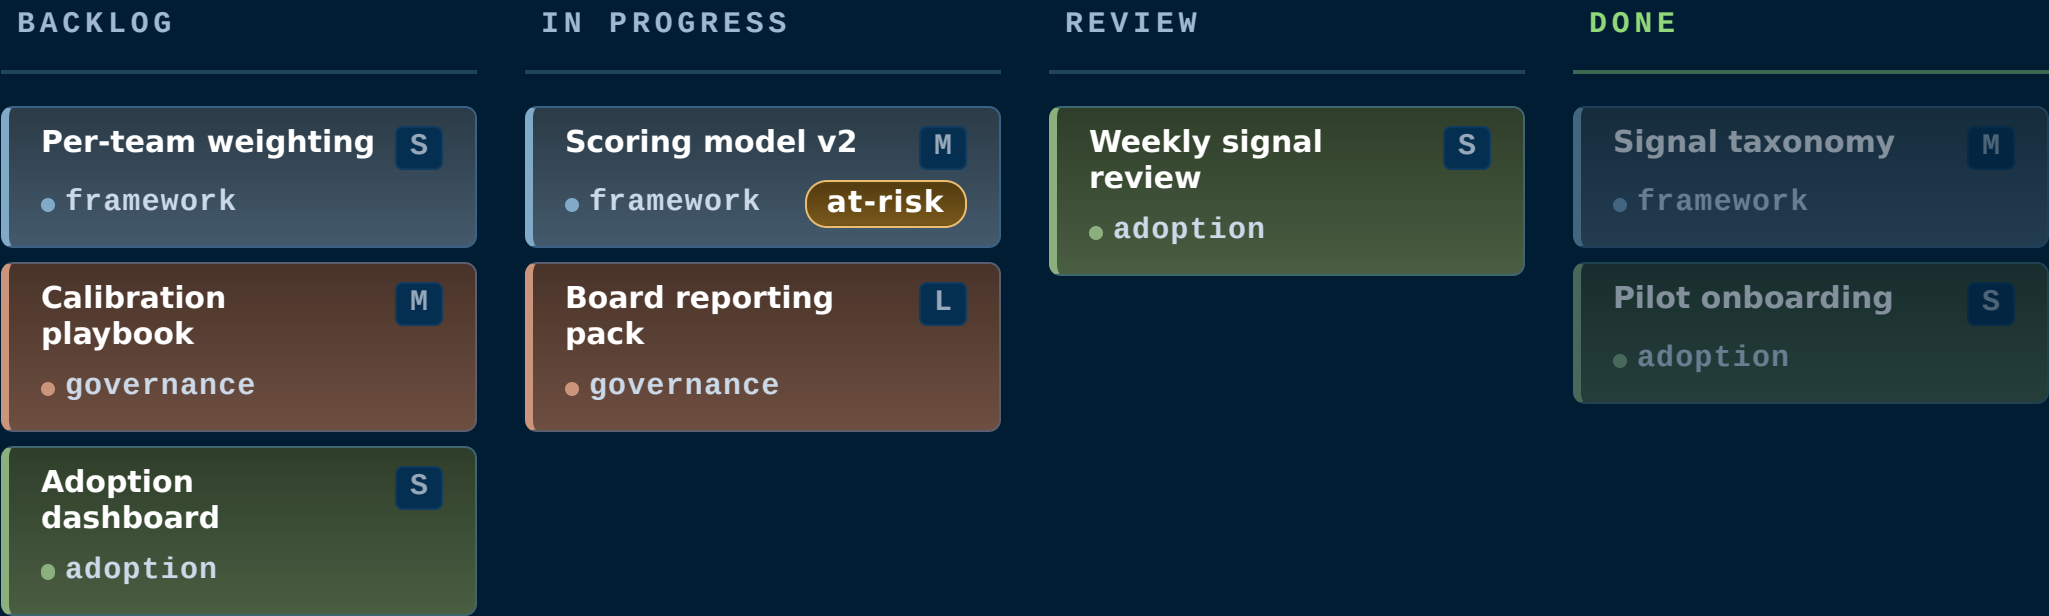

Stress test — four lanes, fifteen cards, and a Backlog that grows faster than Done.

When NOT to reach for kanban.

Schedule, If the question is when each task **not** ships rather than where it sits **status.** today, reach for (spans) (phases). Kanban is `gantt` or `roadmap` a snapshot, not a timeline.

More than Past five columns the cards compress and the column headers crowd.
five lanes. Group adjacent stages or split into two boards (e.g. by team) instead.

Cards A board of bare titles wastes the layout's affordances. Add at least a size
without badge and a lane label so the audience can scan workload and ownership
meta. at a glance.

RELATED COMPONENTS

See also.

`gantt` — schedule of overlapping tasks across lanes, not current state

`roadmap` — phased grid of deliverables across workstreams

`checklist` — single list of items with done/in-flight/planned states

`verdict-grid` — options scored against shared criteria, not stage-tracked
