

TYPOGRAPHY · GLOBAL FONT SCALE

Bigger when the room is bigger

One modifier bumps every font on a slide — or the whole deck — up in lockstep.

Three steps, one knob.

— ×1.15

scale-l

Gentle bump. Slightly larger rooms; body lands near 18 pt.

— ×1.3

scale-xl

Strong. Projection and back-of-room reading; body near 21 pt.

— ×1.5

scale-2xl

Dramatic. Large halls and low-vision accessibility; body at 24 pt.

One multiplier

--fs-scale feeds all 12 tokens, so proportions hold — only the magnitude moves.

Default — tuned for desk distance.

Body

Cards, lists, and prose at the baseline 16 pt.

Headings

Every h-level at its normalized size.

Chrome

Footer, pagination, and eyebrow labels.

Hero

The one big number, when a slide has one.

scale-l — a gentle lift.

Body

Cards, lists, and prose at the baseline 16 pt.

Headings

Every h-level at its normalized size.

Chrome

Footer, pagination, and eyebrow labels.

Hero

The one big number, when a slide has one.

scale-xl — projection size.

Body

Cards, lists, and prose at the baseline 16 pt.

Headings

Every h-level at its normalized size.

Chrome

Footer, pagination, and eyebrow labels.

Hero

The one big number, when a slide has one.

scale-2xl — the back row.

Body

Prose at 24 pt.

Headings

Lifted in lockstep.

Chrome

Footer and page number grow too.

Hero

Scales with everything.

ACROSS THE BOARD

1.3×

Even the display tier rides `--`
`fs-scale`. The hero, the
headings, and the chrome all
move together — nothing is
left behind at the original size.

One slide, or the whole deck.

One slide

```` — the spot directive scales just this section.

## Whole deck

Put `class: scale-xl` in the front matter — every slide grows.

## Composes

Stacks with any layout or variant — `dark`, `kpi`, grids — it only sets a custom property.

## Not a size picker

For one wrong element, fix its token. Scale is for magnitude, not surgery.

REACH FOR IT WHEN THE ROOM DEMANDS IT

## Same deck, two distances.

*Author once at desk-distance, then  
scale up for the projector — the  
proportions you tuned come along for  
free.*
