

IMAGERY · CANVAS · PROSE

# video

A video as a static, PDF-safe embed: a poster that links to the clip, a play badge, the provider's name, and a scannable QR to the same URL — never a live iframe.

---

## Onboarding that sticks — watch a customer do it live.

Ninety seconds, unscripted: signup to a  
published deck without touching support.

Ree A., Head of Ops at Northwind

## When NOT to reach for video.

**Expecting it to autoplay in the PDF.** A PDF is paper — it can't play video, and the engine bars iframes for security. `video` is a poster + scannable link by design. If you need in-app playback, that's a separate interactive surface, not a boardroom deck.

**A wall of caption.** The caption is one line — 'Scan to watch', a title, a slide and drop the runtime. If you're writing a paragraph about the video, `content` clip in as a `video`. put it in a supporting

**Instagram with no poster.** Instagram's public thumbnails aren't fetchable, `video` with no `poster` bullet falls back to a plain placeholder tile. `poster` for a real still. Author a
