word-cloud

Spiral-packed word cloud — items sized by weight.

What 38 win/loss interviews kept saying, by frequency.

A word cloud on a dark blue background. The words are arranged in a roughly rectangular shape. The most prominent word is 'time-to-value' in the center, rendered in a large, light blue font. Above it is 'onboarding' in a large, light yellow font. To the right of 'onboarding' is 'pricing' in a medium-sized, light yellow font. Further right is 'roadmap' in a medium-sized, light yellow font. Below 'roadmap' are the words 'contracts' and 'residency' in a smaller, light yellow font. To the left of 'onboarding' is the word 'support' written vertically in a medium-sized, light yellow font. Below 'onboarding' is 'integrations' in a medium-sized, light yellow font. To the right of 'integrations' is 'security' in a medium-sized, light yellow font.

What this branch named, by weight.

A word cloud constellation diagram on a dark blue background. The words are arranged in a circular pattern, connected by thin white lines. The word 'component' is the largest and is colored light blue. The word 'function' is the second largest and is white. The word 'manifest' is the third largest and is light blue. The words 'form' and 'substance' are smaller and are white. The word 'gallery' is the smallest and is white. The connections between the words are as follows: 'function' is connected to 'component' and 'gallery'; 'component' is connected to 'function', 'form', and 'manifest'; 'form' is connected to 'component' and 'manifest'; 'manifest' is connected to 'component', 'form', and 'substance'; 'substance' is connected to 'manifest'; and 'gallery' is connected to 'function'.

What this branch named, by weight.

A word cloud visualization showing the frequency of terms in a branch. The words are arranged in a horizontal, slightly curved layout. The word 'component' is the largest and most central, rendered in a light blue color. Other words are in various shades of blue and grey. The words include: 'function' (top center), 'universal' (top right), 'substance' (middle left), 'form' (bottom left), 'variant' (bottom center), 'manifest' (bottom right), and 'gallery' (middle right).

When NOT to reach for word-cloud.

Precise comparisons. If the audience needs to know that 'manifest' is 1.6× 'function', the spiral packing actively misleads. Use `progress` or a bar chart where the eye can compare lengths directly.

Two or three words. A three-word cloud is a list with extra steps. Use `stats` for a metric row or `big-number` for a single weighted headline.

Multi-word phrases. Each li should be a single token. Multi-word phrases blow out the layout and crowd the spiral; if your data is phrases, normalise to keywords first or use `quote` for verbatim text.

See also.

RELATED COMPONENTS

`progress` — the weights need precise visual comparison

`stats` — the headline metrics are independent numbers, not a corpus

`piechart` — the items are parts of a whole, not free-form themes

`quote` — the verbatim language matters more than the frequency

`tldr` — the qualitative summary is prose, not a packed cloud
