substance      function

## When NOT to reach for word-cloud.

**Precise comparisons.** If the audience needs to know that 'manifest' is 1.6× 'function', the spiral packing actively misleads. Use `progress` or a bar chart where the eye can compare lengths directly.

**Two or three words.** A three-word cloud is a list with extra steps. Use `stats` for a metric row or `big-number` for a single weighted headline.

**Multi-word phrases.** Each li should be a single token. Multi-word phrases blow out the layout and crowd the spiral; if your data is phrases, normalise to keywords first or use `quote` for verbatim text.

# See also.

## *RELATED COMPONENTS*

`progress` — the weights need precise visual comparison

`stats` — the headline metrics are independent numbers, not a corpus

`piechart` — the items are parts of a whole, not free-form themes

`quote` — the verbatim language matters more than the frequency

`tldr` — the qualitative summary is prose, not a packed cloud
