glossary

Two-column term/definition table with auto-derived alphabetic range pill.

Glossary

C – P

TERM	DEFINITION
Consent	A freely given, specific, informed agreement to processing — pre-ticked boxes don't count.
Controller	The party that decides why and how personal data is processed, and carries the legal accountability for it.
DSAR	Data Subject Access Request — a person's demand to see, correct, or delete the data held on them, on a 45-day clock under CCPA.
PII	Personal information that identifies a person, now read broadly enough to cover device IDs, cookies, and IP addresses.
Processor	A party that processes data on the controller's instructions — a vendor, not the decision-maker.

When NOT to reach for glossary.

Multi-sentence definitions.

Each entry is one short line. If a definition needs context or examples, the term deserves its own slide — use a divider (light variant) with the term as the heading.

Mixed term lengths. If some terms are single words and others are full phrases, the left column gets ragged. Trim long terms to their canonical short form.

Hand-written range pill. The runtime derives the range pill (e.g. "A – G") from the entries. Authoring it into the heading double-stamps it.

RELATED COMPONENTS

See also.

`list-tabular` — rows are key/value reference, not term/definition

`divider` — lighter mid-section orientation — the bright-canvas `light` variant

`actors` — the left column is a named person, not a term

`list` — declared statements — the `principles` variant
